Math from Three to Seven Aleksandr Kalmanovich Zvonkin, 2011 This book is a captivating account of a professional mathematician's experiences conducting a math circle for preschoolers in his apartment in Moscow in the 1980s As anyone who has taught or raised young children knows mathematical education for little kids is a real mystery What are they capable of What should they learn first How hard should they work Should they even work at all Should we push them or just let them be There are no correct answers to these questions and the author deals with them in classic math circle style he doesn't ask and then answer a question but shows us a problem be it mathematical or pedagogical and describes to us what happened His book is a narrative about what he did what he tried what worked what failed but most important what the kids experienced This book does not purport to show you how to create precocious high achievers It is just one person's story about things he tried with a half dozen young children Mathematicians psychologists educators parents and everybody interested in the intellectual development in young children will find this book to be an invaluable inspiring resource In the interest of fostering a greater awareness and appreciation of mathematics and its connections to other disciplines and everyday life MSRI and the AMS are publishing books in the Mathematical Circles Library series as a service to young people their parents and teachers and the mathematics profession Titles in this series are co-published with the Mathematical Sciences Research Institute MSRI

Using Assessment To Reshape Mathematics Teaching Sandra K. Wilcox, 2000-04-01 This casebook is intended to support professionals who are working in a variety of contexts to use classroom based assessment more effectively to support teacher learning and teaching change and to enhance the opportunities for all students to develop mathematical power It grows out of a collaboration of mathematics teachers and teacher educators and mathematicians to better understand the role of assessment as an ongoing activity to help teachers reshape their own teaching practices At the heart of each case is using assessment to make sense of what students understand and what they are confused about deciding what counts as evidence of that understanding and using the analysis to consider what the teacher's next instructional moves might be All of the cases in this volume are built around actual episodes from mathematics classrooms Intended as decision making exercises they present the raw data of classroom events in a straightforward way and are designed to stimulate analysis and reflection provoke various and sometimes conflicting interpretations of an event bring to the fore deeply held beliefs of beginning and experienced teachers so they can be reconsidered and engage professionals in pedagogical problem solving in the context of complex classroom settings This volume reflects the growing interest in cases as a pedagogical tool in teacher professional

development The cases are organized to take up key themes of the NCTM Professional Teaching Standards in ways that will assist and support teachers teacher educators and curriculum and staff development specialists in learning to assess and in linking assessment with curriculum teaching and learning Although each case contains many ideas for linking assessment with curriculum and instruction the most powerful use of these materials resides in their design intended to foster conversations among groups of professional colleagues The editors field testing of the cases in initial teacher certification courses and in in service workshops has shown that they prompt engaging and demanding analysis through a variety of analytic lenses A videotape containing vignettes for four of the cases in the Casebook is available with this book Transcriptions of the video vignettes are printed in the case materials in the book Course instructors and professional development facilitators will need both the Casebook and the videotape and should order the Casebook Video set The video can also be ordered separately
