Discrimination in an Unequal World Miguel Angel Centeno, Katherine S. Newman, 2010-09 Is globalization making our world more equal or less Proponents of globalization argue that it is helping and that in a competitive world no one can afford to discriminate except on the basis of skills Opponents counter that globalization does nothing but provide a meritocratic patina on a consistently unequal distribution of opportunity Yet despite

the often deafening volume of the debate there is surprisingly little empirical work available on the extent to which the process of globalization over the past quarter century has had any effect on discrimination Tackling this challenge Discrimination in an Unequal World explores the relationship between discrimination and unequal outcomes in the appropriate geographical and historical context Noting how each society tends to see its particular version of discrimination as universal and obvious the editors expand their set of cases to include a broad variety of social relations and practices However since methods differ and are often designed for particular national circumstances they set the much more ambitious and practical goal of establishing a base with which different forms of discrimination across the world can be compared Derived from a broad array of methods the book draws many important lessons on the new means by which the world creates social hierarchies the democratization of inequality and the disappearance of traditional categories **Let's Talk About**

Student Loan Schemes, 2009 *British Education Index*, 2003 *Private Student Loans* Richard Cordray, 2013-02-11 This report details the risky practices and debt that stemmed from the boom and bust of the private student loan market in the past ten years According to the report's estimates outstanding student loan debt in the U S topped 1 trillion in 2011

Students were yet another group of consumers that were hurt by the boom and bust of the financial crisis. The report found that too many student loan borrowers were given loans they could not afford and sometimes for more money than they needed. They are now overwhelmed by debt and regret the decisions they made. There are striking similarities between stories of the private student loan market and stories of mortgage market in the years leading up to the financial crisis. Before the financial crisis, some lenders in both markets engaged in aggressive marketing and risky underwriting. They also originated loans for immediate sale. Not all lenders chose this path, but enough did to produce a market-wide trend. Contents of this report: Lenders, Loan Markets and Products, Borrower Characteristics and Behaviors, Consumer Protection, Fair Lending, Issues, Recommendations, Student Loan Glossary, Figures and tables.
