The Rice Crisis David Dawe,2012-07-26 The recent escalation of world food prices particularly for cereals prompted mass public indignation and demonstrations in many countries from the price of tortilla flour in Mexico to that of rice in the Philippines and pasta in Italy The crisis has important implications for future government trade and food security policies as countries re evaluate their reliance on potentially more volatile world markets to augment domestic supplies of staple foods This book examines how government policies caused and responded to soaring world prices in the particular case of rice which is the world s most important source of calories for the poor Comparable case studies of policy reactions in different countries principally across Asia but also including the USA provide the understanding necessary to evaluate the impact of trade policy on the food security of poor farmers and consumers They also provide important insights into the concerns of developing countries that are relevant for future international trade negotiations in key agricultural commodities As a result more appropriate policies can be put in place to ensure more stable food supplies in the future Published with the Food and Agriculture FAO Organization of the United Nations

Social Impact of the Global Financial Crisis in the Philippines Arsenio M. Balisacan, 2010-12-01 Anecdotal evidence permeates accounts on the impact of the global economic crisis on Philippine poverty This study systematically assesses the evidence and recent data It adopts a somewhat eclectic approach as applying regression and decomposition techniques to trace the impact of the global economic crisis on gross domestic product and its major components constructing panel data from nationally representative household surveys to trace the changes in household welfare during the crisis and combining national income accounts and household survey data to simulate the differential effects of the crisis across population groups and social divides Empirical findings suggest that although the Philippine economy did not slide to recession during the crisis its impact on the economy and poverty across population groups was nonetheless severe and may linger for many years to come
