The Media and Communications Study Skills Student Guide Doug Specht, 2020-11-25 All the tips ideas and advice given to and requested by MA students in Media and Communications are brought together in an easy to use accessible guide to help students study most effectively Based upon many years of teaching study skills and hundreds of lecture slides and handouts this introduction covers a range of general and generic skills that the author relates specifically towards media and communications studies As well as the mechanics of writing and presentations the book also shows how students can work on and engage with the critical and contemplative elements of their degrees whilst retaining motivation and refining timekeeping skills Of course the nuts and bolts of reading writing listening seminars and the dreaded dissertation and essays are covered too In addition advice on referencing citation and academic style is offered for those with concerns over English grammar and expression Aimed primarily at postgraduate students there is significant crossover with undergraduate work so this book will also prove of use to upper level undergraduate readers whether using English as a first or second language

Interfaces to Database Systems (IDS94) Peter H. Sawyer, 2013-11-11 A brief survey of the major DBMS and HeI conference proceedings over the past 10 years will reveal isolated pockets of research in database user interfaces but little sense of being swept along with the general advances in DBMS technology and HeI New data models have evolved to meet the needs of different application domains persistent programming languages are blurring the traditional distinction between data definition and application programming languages distribution and inter operability have become issues as have the storage of heterogeneous media types yet it is still rare to read of the HeI issues raised by these technological innovations being expressly addressed and rarer still to find recognition of the usability problems with longer established database technologies There are at least two reasons why this should be surprising Database systems are not like other computer systems existing both as back ends to other applications and as stand alone data stores they are typically slow deal with very large volumes of data and can involve all sorts of security confidentiality and even cooperability issues Databases are everywhere Perhaps only word processors and spread sheets are more widespread In addition as business cultures change and personal computing continues to mould expectations end users find themselves interacting increasingly closely with database systems
