Toshiba handles its own process development, and has its own fully controlled wafer fab, packaging and test facilities. SoC and ASICs created by ESD:IC are manufactured at Toshiba's 300mm wafer fabrication facilities in Oita and Nagasaki. The company continues to invest in technology and has capacity to ensure reliable support of customer requirements and the needs of its own ASIC programmes.

Oita Fab

Nagasaki Fab

Toshiba is able to commercialise leading-edge CMOS processes for advanced ICs one to two years ahead of the industry, to the direct benefit of our 300mm manufacturing customers. By leading the industry in producing high-performance system-level ICs in 300mm since 2003, plus early commercialisation of 65nm in 2006 – with development of 40 and 28nm process technologies underway – Toshiba is able to stay ahead of the yield-curve and is continuously solving DFM complexities to enhance performance, minimise time-to-revenue and reduce IC cost.
