## **Tshwane South Grade 11 Mathematical Literacy:**

*Mathematics Teaching and Professional Learning in sub-Saharan Africa* Kakoma Luneta, 2021-12-09 The book represents a crop of wide ranging research conducted by renowned scholars in sub-Saharan Africa revolving around mathematics teaching and professional development programs for mathematics teachers. The research-based proposals and actual how to conduct professional development initiatives that enhance effective mathematics instruction are rooted in teacher input and informed by learners' errors and misconceptions. The book provides a comprehensive snapshot on mathematics teaching, learning, and effective professional development programmes for mathematics teachers in sub-Saharan Africa. It is the only research output that advances and disseminates issues of mathematics education and research in the region with input from South Africa, Kenya, Rwanda, Uganda, Malawi, Namibia, Lesotho, Ethiopia, and Zimbabwe. **Drum**, 2007 [Data-based Decision Making in Education](#) Kim Schildkamp, Mei Kuin Lai, Lorna Earl, 2012-09-17 In a context where schools are held more and more accountable for the education they provide, data-based decision making has become increasingly important. This book brings together scholars from several countries to examine data-based decision making. Data-based decision making in this book refers to making decisions based on a broad range of evidence such as scores on students' assessments, classroom observations, etc. This book supports policy makers, people working with schools, researchers, and school leaders and teachers in the use of data by bringing together the current research conducted on data use across multiple countries into a single volume. Some of these studies are best practice studies where effective data use has led to improvements in student learning. Others provide insight into challenges in both policy and practice environments. Each of them draws on research and literature in the field. *OBE for FET mathematical literacy*, 2006 **Shades of Globalization in Three Early Childhood Settings** Ailie Cleghorn, Larry Prochner, 2010-01-01 *Shades of Globalization* casts an ethnographic eye on the interplay between local and global influences on the organization and activities within three early childhood settings, each of which is located in a context of rapid social change. Stemming from a four-year study of early childhood thought and practice, each of the eight chapters touches on a different aspect of the three case study preschools: one each in India, South Africa, and an aboriginal community in Canada. The authors take a critical perspective on taken-for-granted assumptions about what constitutes the most appropriate preschool experience for children, querying, for example, the meaning of school readiness within local communities. This book will appeal to those who have an interest in the diversity of children's lives and preschool experiences throughout the world: education and social policy makers, teacher educators, teachers, pre-service student teachers, day care workers, parents, community leaders, governmental and non-governmental organizations and consultants, early childhood program planners and evaluators, community development workers, university lecturers, and developmental psychologists. Ailie Cleghorn is Professor of Education at Concordia University in Montreal. She teaches in the Educational Studies Masters Program and conducts research that is grounded in her field of comparative sociology of education. Earlier
