The Changing Economic Geography of Globalization Giovanna Vertova, 2006-04-20 The process of globalization has had profound often destabilizing effects on space at all levels i.e. local regional national international This revealing book analyzes both theoretically and empirically the effects of globalization over space It considers through a dialogue among different paradigms the ways in which space has become more important in the global economy Globalization has been advocated as a way of shrinking time and space which will lead to a homogenized global market a suggestion challenged in differing ways and with a variety of approaches by all the contributors to this volume Leading authorities from a range of disciplines are represented amongst this impressive list of contributors including Eric Sheppard Bjørn Asheim Richard Walker and Peter Swann The chapters demonstrate persuasively the continuing and even increasing role of space in the global economy and

throughout the book covers viewpoints from the fields of international political economy economic geography regional and local economics This impressive volume which contains a selection of the best in contemporary scholarship will be of interest to the international arena of academicians policy makers and professionals in these or related fields

The Man in the Monkeynut Coat Kersten T. Hall, 2014 Tells the story of the English physicist and molecular biologist William T Astbury and how his work forms a previously untold chapter in the story of the discovery of the structure of DNA **The SAGE**

Handbook of Geographical Knowledge John A Agnew, David N Livingstone, 2011-03-04 Broad in scope and edited by two massive names in geography this is a critical exploration of how the field has emerged and fared over the course of its modern institutionalization Doctoral Examination: Exploring Practice Across the Globe Vijay Kumar, Stan Taylor, Sharon Sharmini, 2022-11-30 This book considers how the main doctoral awarding countries from across the globe examine doctoral degrees It compares and contrasts their approaches comments on their robustness and identifies examples of good practice The doctorate is the highest award made by universities but the examination process involved varies considerably in form and structure across the globe This book studies the similarities and differences systematically on a cross national basis providing insights into the ways in which countries have sought to ensure that the awarded degree is comparable in standards This book presents case studies of examination policies and practices covering 20 countries which collectively are responsible for nearly 75% of global doctoral awards Each chapter includes a summary of the key points and a concluding chapter analyses the case studies from a comparative perspective This book is written by a distinguished international team of authors who are researchers in doctoral education and will be of interest to all those engaged in the field particularly policy makers graduate deans and programme leaders supervisors administrators examiners and scholars in the field

Geographers Elizabeth Baigent, André Reyes Novaes, 2017-12-14 *Geographers Biobibliographical Studies* Volume 36 focuses on 20th century Britain and 19th and 20th century France Six essays on individual geographers are complemented by a group article which describes the building of a French school of geography From Britain the life of Sir Peter Hall one of the most distinguished geographers of recent times and a man widely known outside the discipline is set alongside memoirs of Bill Mead who made the rich geography of the Nordic countries come alive to geographers and others in the Anglophone world Michael John Wise and Stanley Henry Beaver who made their mark through building up the institutions where academic geography was practised and through teaching and Anita McConnell whose geographical training shaped her museum curation and studies of the history of science From France the individual biography of Andr Meynier is juxtaposed with group article on the first five professors of geography at Clermont Ferrand These intellectual biographies collectively show geography and geographers profoundly affected by wider historical events the effect of war particularly the Second World War and the shaping of post war society They show the value of geographical scholarship in elucidating local circumstances and in planning national conditions and as a basis for local national and international friendship

Geography Education's Potential and the Capability Approach Richard Bustin, 2019-08-10 This book explores the pivotal role that geography as a school subject plays in helping every young person achieve their educational potential Expressed as GeoCapabilities this concept draws on the the capabilities approach developed by Amartya Sen and Martha Nussbaum applied to curriculum thinking in schools While traditional subjects have often been deemed irrelevant and outdated in an overcrowded secondary school curriculum subjects like geography have often been lost or combined with others to fulfil a broad skills agenda More recent talk of a knowledge led curriculum can often lead to the recitation of facts at the expense of developing deeper understanding This book argues the concept of powerful geographical knowledge based on the work of Michael Young and David Lambert invests the subject of geography with its educational potential this forms the basis of GeoCapabilities GeoCapabilities focuses on both what is being taught and why and as such provides a framework of curriculum thinking which will be of interest and value to geography teachers school leaders with curriculum development responsibilities and all those interested in the capability approach and the moral imperative of education

The Origins And Spread Of Agriculture And Pastoralism In Eurasia David R. Harris, 2024-11-01 As the first book to examine the origins and spread of agriculture and pastoralism in Europe and Asia as a whole this major contribution should be essential reading for archaeologists anthropologists biologists and geographers Adopting a novel approach to the subject the authors examine it first in terms of seven different disciplinary perspectives social ecological genetic linguistic biomolecular epidemiological and geographical Then 20 case studies are presented which are based primarily on archaeological and biological evidence and which relate to three major regions Southwest Asia Europe and Central Asia to the Pacific The book concludes with an overview of Eurasia as a whole The transition from hunting and gathering to agriculture had revolutionary consequences for human society It led to the emergence of urban civilizations and ultimately to humanity's almost complete dependence on relatively few domesticated animals and plants The subject has been much studied but the results have tended to be interpreted largely in terms of local cultural sequences with insufficient comparison made with evidence from other areas In contrast this book provides a continental scale framework with its scope extended to pastoralism because in Eurasia both the raising of livestock and the cultivation of crops were integral components of the agricultural revolution from its inception some 10 000 years ago Comprehensive and authoritative *The Origins and Spread of Agriculture and Pastoralism in Eurasia* should appeal strongly to the wide readership of students and specialists concerned with the prehistoric antecedents of modern civilization

The Rural Richard Munton, 2017-05-15 The rural has long been regarded as an important site of geographical inquiry even if our understanding of it has not always been treated as conceptually different from the urban That said rural research has pursued a number of distinct empirical agendas ranging from the operation and impacts of agribusiness to local resistance to global food supply chains to differing representations of the rural In doing so rural geographers have critically examined the relevance and significance of ideas drawn from numerous traditions including

political economy ecological modernization and cultural theory amending them as appropriate in their search to understand the nature and trajectory of rural areas Up until the 1980s attention remained largely focused upon agriculture as the primary land use but increasingly new forms of rural consumption housing recreation nature conservation have taken centre stage as the primacy of local agricultures has been undermined by reduced state protection and new rural populations which have migrated out from the city More recently research has been dominated by the cultural turn with particular emphases upon society nature relations interpretations of landscape marginalised others and analyses of the relations between representation and practice In the last decade a more holistic view of the rural bringing together different aspects of the two previous themes has emerged through more politically oriented studies of rural governance concerned with the functioning of interest groups participation protest and the allocation and management of resources The volume is thus structured into three sections concerned with agriculture and food the rural and rural governance The great majority of the selected papers combine both empirical material often highly informative case studies and important conceptual arguments about change in the rural condition that can be linked to ideas being employed elsewhere in Geography and the Social Sciences more generally These critical reflections have been drawn very largely from research conducted in advanced economies which at least provide some commonality of experience allowing the transfer of ideas between what otherwise might be seen as very differing geographical contexts *Geography*, 1981 Includes section Reviews and other bibliographical material

Geographers Hayden Lorimer, Charles W. J. Withers, 2016-09-22 *Geographers Biobibliographical Studies* Volume 35 includes seven essays discussing the contribution made to geography by eleven geographers The subjects include three British figures Francis Rennell Rodd 1895 1978 expert on the Sahara David Harris 1930 2013 a geographer with archaeological interests and William Gordon East historical geographer 1902 1998 a Spanish urban scholar Enric Martin 1928 2012 Mauricio de Almeida Abreu 1948 2011 a Brazilian urban and historical geographer and two essays on French geographers one on Jacques Levainville 1869 1932 the other an innovative prosopographical essay on five French authors involved in the monumental Vidalian *Geographie Universelle* of the early 20th century In these studies geography's international dimensions are illuminated and the subject's vibrant history shown to be the result of committed endeavours in the field in the classroom and in print *Applied Geography* Michael Pacione, 2002-03-11 *Applied Geography* offers an invaluable introduction to useful research in physical environmental and human geography and provides a new focus and reference point for investigating and understanding problem orientated research Forty nine leading experts in the field introduce and explore research which crosses the traditional boundary between physical and human geography A wide range of key issues and contemporary debates are within the book's main sections which cover natural and environmental hazards environmental change and management challenges of the human environment techniques of spatial analysis *Applied geography* is the application of geographic knowledge and skills to identify the nature and causes of social economic and

environmental problems and inform policies which lead to their resolution

A Geography of Heritage Brian Graham, Greg Ashworth, John Tunbridge, 2016-04-29 The concept of heritage relates to the ways in which contemporary society uses the past as a social political or economic resource However heritage is open to interpretation and its value may be perceived from differing perspectives often reflecting divisions in society Moreover the schism between the cultural and economic uses of heritage also gives rise to potential conflicts of interest Examining these issues in depth this book is the first sustained attempt to integrate the study of heritage into contemporary human geography It is structured around three themes the diversity of use and consumption of heritage as a multi sold cultural and economic resource the conflicts and tensions arising from this multiplicity of uses producers and consumers and the relationship between heritage and identity at a variety of scales

The Urban Geography Reader NICK FYFE, JUDITH KENNY, 2020-04-15 Drawing on a rich diversity of theoretical approaches and analytical strategies urban geographers have been at the forefront of understanding the global and local processes shaping cities and of making sense of the urban experiences of a wide variety of social groups Through their links with those working in the fields of urban policy design urban geographers have also played an important role in the analysis of the economic and social problems confronting cities Capturing the diversity of scholarship in the field of urban geography this reader presents a stimulating selection of articles and excerpts by leading figures Organized around seven themes it addresses the changing economic social cultural and technological conditions of contemporary urbanization and the range of personal and public responses It reflects the academic importance of urban geography in terms of both its theoretical and empirical analysis as well as its applied policy relevance and features extensive editorial input in the form of general section and individual extract introductions Bringing together in one volume classic and contemporary pieces of urban geography studies undertaken in the developed and developing worlds and examples of theoretical and applied research it provides in a convenient student friendly format an unparalleled resource for those studying the complex geographies of urban areas

GO: On the Geographies of Gunnar Olsson Martin Gren, 2016-04-22 Since the early 1960s the internationally acclaimed and highly distinguished Swedish geographer Gunnar Olsson has made substantial contributions to his own discipline In addition because of the transgressive nature of his work and writing which often borders to art and philosophy his ideas and approaches have reached a wider audience of those interested in the history and geography of ideas culture and human reasoning Olsson s recent masterpiece *Abysmal* is a minimalist guide to the territory of Western culture In it he investigates how cartographical reason enables people to think about and navigate the abstract world of invisible human relations in much the same way as they are able to study and traverse the physical Earth by using maps and mapping This book presents a comprehensive introduction to and overview of the entire range of Olsson s geography from the early days of spatial science to his contemporary engagement with and critique of cartographical

reasoning It includes selected samples of Olsson s own writings including rarities together with a consolidated bibliography of his publications It also contains critical engagements from leading scholars such as Michael Dear Michael Watts Chris Philo and Marcus Doel with Olsson s geography from a variety of perspectives which are particularly valuable to those readers who already know his work It is structured and written in a way that makes Olsson s geography accessible to a wide readership including those who are not already familiar with Olsson s work *British Universities' Guide to Graduate Study*
