The Ultimate Route to Market Ian Shanahan, 2018-07-20 Global systems integrators, outsourcers and consulting firms are responsible for directly leveraging or influencing most IT investment in large corporations. Original equipment manufacturers, OEMs, software companies and other technology providers aspire to create mutually successful partnerships with the large influencers due to their business case driven approach, their early stage engagement in the sales cycle, their C Suite relationships with large multi national enterprises and the often giant scale of the typical technology spend that their projects and engagements drive. The projects that these companies deliver are specialist and complex meaning that companies who aspire to work successfully in the sector require skill, knowledge and a sophisticated alliance approach to gain credibility and maintain long term sustainable relationships. *The Ultimate Route to Market* provides an insight into the practices, construct and culture of global consulting firms, systems integrators and outsourcers and provides a suggested framework for a successful alliance with them. Here Ian Shanahan provides organisations with an overview of the global systems integrator, outsourcer and consulting firm sectors, provides insight into their culture and expertly explains alliance best practice methodology. This is a must read for anyone that aspires to understand the market, how it works and how they become desirable to the large IT services companies so that they can execute alliance engagements to the sector in a measured, methodical and low risk way.
