Grace, T.M.

Knowlton, A.A. Avidan, 2012-12-06 Since the late 1970s there has been an explosion of industrial and academic interest in circulating fluidized beds. In part the attention has arisen due to the environmental advantages associated with CFB circulating fluidized bed combustion systems, the incorporation of riser reactors employing circulating fluidized bed technology in petroleum refineries for fluid catalytic cracking and to a lesser extent the successes of CFB technology for calcination reactions and Fischer Tropsch synthesis. In part it was also the case that too much attention had been devoted to bubbling fluidized beds and it was time to move on to more complex and more advantageous regimes of operation. Since 1980 a number of CFB processes have been commercialized. There have been five successful International Circulating Fluidized Bed Conferences beginning in 1985, the most recent taking place in Beijing in May 1996. In addition we have witnessed a host of other papers on CFB fundamentals and applications in journals and other archival publications. There have also been several review papers and books on specific CFB topics. However, there has been no comprehensive book reviewing the field and attempting to provide an overview of both fundamentals and applications. The purpose of this book is to fill this vacuum. *Paperbound Books in Print*, 1991. *Forthcoming Books* Rose Arny, 1999-08. *The Encyclopedia Britannica* James Louis Garvin, Franklin Henry Hooper, Warren E. Rethinking Security in Nigeria Dapo Adelugba, Ogo Ujomu, 2007-05-15. *Rethinking Security in Nigeria* adopts an alternate conceptual and methodological framework for rethinking national security in Nigeria by using the humanities multidisciplinary perspective against the backdrop of the hitherto restrictive analysis of the nature of national security. By expounding the largely unexplored cosmological, conceptual, ethical and aesthetic dimensions as key contributors to national survival and social integration, the volume argues systematically for a basic redefinition of the meanings of security, the value of life, government action and social re-engineering in order to create a new system of social order and integration. The authors attempt to extend the boundaries of previous theorizing on security by identifying alternate ethical and aesthetic approaches to national reconciliation and human development in present day Nigeria, which faces major security challenges requiring the clarification of the basis for developing a just and harmonious society. The study is a contribution to the quest for defining the vital socio-cultural norms and doctrinal imperatives needed for responsible cooperative human action. It examines the roles of dominant works of philosophy, literature, plays and performances in the creation of a basis for political stability and social reconciliation in the society. It extends the boundaries of previous aesthetic studies and redefines the roles of ethics and aesthetics as crucial contributors to security, human development and world civilisation. **Bulletin** Boston Public Library, 1883.
