Divall, Richard Goodey, Neil Taylor, Sarah Stallebrass, Jignasha Panchal, 2018-07-11 Physical Modelling in Geotechnics collects
more than 1500 pages of peer reviewed papers written by researchers from over 30 countries and presented at the 9th
International Conference on Physical Modelling in Geotechnics 2018 City University of London UK 17 20 July 2018 The
ICPMG series has grown such that two volumes of proceedings were required to publish all contributions The books
represent a substantial body of work in four years Physical Modelling in Geotechnics contains 230 papers including eight
keynote and themed lectures representing the state of the art in physical modelling research in aspects as diverse as
fundamental modelling including sensors imaging modelling techniques and scaling onshore and offshore foundations dams
and embankments retaining walls and deep excavations ground improvement and environmental engineering tunnels and
geohazards including significant contributions in the area of seismic engineering ISSMGE TC104 have identified areas for
special attention including education in physical modelling and the promotion of physical modelling to industry With this in
mind there is a special themed paper on education focusing on both undergraduate and postgraduate teaching as well as
practicing geotechnical engineers Physical modelling has entered a new era with the advent of exciting work on real time
interfaces between physical and numerical modelling and the growth of facilities and expertise that enable development of so
