Caldwell, 1987 This is a comprehensive first course in accounting for students with no previous training in accounting or business. Designed for both majors and nonmajors, the textbook is part of a well integrated package for students and instructors that includes many manual and computer ancillaries not found in previous editions.     *Principles of Financial Accounting* Belverd E. Needles, Marian Powers, 2005 Designed for financial accounting programs that prefer to start with a sole proprietorship approach, this market leading text provides business students with a strong foundation in accounting procedures and emphasizes the use of financial information in decision making and analysis. The text intended for use in a single semester or quarter contains balanced, flexible content supported by an array of integrated print and technology supplements. The 2005e Edition maintains a high standard for accuracy, integrates performance measurement, and emphasizes technology. Real world examples appear throughout the text to help students link accounting procedures to publicly held companies as well as international governmental and not-for-profit organizations.     *Journal of Accounting Education* James Madison University, 1989     Business Education Forum, 1982
