Improving Business Performance Through Innovation in the Digital Economy Oncioiu, Ionica, 2019-09-06 In the 21st century advancements in the digital world are bringing about rapid waves of change in organizational management. As such it is increasingly imperative to discover ways for businesses to adapt to changes in the markets and seize various digital marketing opportunities. *Improving Business Performance Through Innovation in the Digital Economy* is an essential reference source for the latest research on the impact of digital computing. It investigates new economic and entrepreneurial approaches to enhancing community development. Featuring research on topics such as business ethics, mobile technology and cyber security, this book is ideally designed for knowledge workers, business managers, executives, entrepreneurs, small and medium enterprise managers, academicians, researchers, students and global leaders seeking coverage on the management of sustainable enterprises. *CMA*, 1991 **Game Theory in Management Accounting** David Mueller, Ralf Trost, 2017-09-21 This book demonstrates what kind of problems originating in a management accounting setting may be solved with game theoretic models. Game theory has experienced growing interest and numerous applications in the field of management accounting. The main focus traditionally has been on the field of non-cooperative behaviour, but the area of cooperative game theory has developed rapidly and has received increasing attention. Intensive research in combination with the changing culture of publishing has produced a nearly unmanageable number of publications in the areas concerned. Therefore one main purpose of this volume is providing an intensive analysis of the intersection of these areas. In addition, the book strengthens the relationship between the theory and the practical applications and it illustrates the two-sided relationship between game theory and management accounting. New game theoretic models offer new fields of applications and these applications raise new questions for the theory. *Two Hundred Years of Accounting Research* Richard Mattessich, 2007-11-15 This is the first and only book to offer a comprehensive survey of accounting research on a broad international scale for the last two centuries. Its main emphasis is on accounting research in the English, German, Italian, French and Spanish language areas; it also contains chapters dealing with research in Finland, the Netherlands, Scandinavia and the United States.

Digital Transformation and Enterprise Information Systems Adelaide Martins, Carolina Machado, 2024-11-22 Today only having information is insufficient for a competitive advantage. To be ahead of your competitors you need to know them and for this it is important to constantly manage news and content. The information needs to be condensed and analyzed so that it can be useful to decision makers. Enterprise systems let you collect, organize, analyze, and disseminate content so it can serve your business goals quickly. It is a daily business process particularly for small businesses dealing with large amounts of information and digital transformation process. How you handle this information can be a competitive advantage for businesses. Digital Transformation and Enterprise Information Systems introduces new ways to use new digital technologies to enable major business improvements, enhance customer experience, simplify operations, and create new business models. It provides a better understanding of the impact of digital transformation on how enterprise systems and enterprise information technology services are managed and delivered. The book offers new knowledge on how enterprise systems influence digital business transformation and its role along with addressing several dimensions of digital transformation in favor of SMEs. The result provides business leaders with tools and strategies to manage their enterprises better. This reference book can be used by researchers, undergraduate students taking engineering and management courses, and managers, engineers, and other professionals in fields related to technologies, management, and engineering innovation.
