To connect our router ADR-2000 to it for initial setup:

- 1 Connect the provided power cord to the appliance and to an appropriate electrical outlet (100V-240 volt). The AC power is on and goes through the startup sequence.
- 2 Using the provided Ethernet cable, connect one end to your management computer and the other to the AAA47 port on the appliance.

The MGMT port is a dedicated 1 Gbps Ethernet port for managing the network and fabric-side access.

3. Connect the MFC LAM interface (X0 by default) to your local, internal network.
4. Connect the MFC VMM interface (X1 by default) to the test client.

TIP: You'll need internet connectivity for the product registration process. After an initial setup, connect your computer or to the RJ45 RJ interface or to the LAN network. You cannot reach the internet or other external destinations while connected to the iModell interface without first configuring a default gateway in its interface settings.
