management context to allow for the consideration of upstream supply chain structures in the category strategy development process. The proposed approach introduces strategic groups of supply chains as a segmentation criterion for complex global supply networks which enables the network wide alignment of competitive priorities, flexibility requirements and partnerships with suppliers. Supply chain based category strategies can effectively reduce the complexity firms are facing in this context. The results of this research are applicable for certain types of global supply networks and can be used for network alignment and strategy development. The approach can furthermore generate valuable insights useable for negotiation support with suppliers.
