*Statement in Five Western Cape Schools* Nicole Arendse,2013 This dissertation is an investigation into the constitution of  
school mathematics within the context of the Revised National Curriculum Statement in a selection of Grade 8 mathematics  
lessons in five working class schools in the Western Cape Province of South Africa The study is located within the broad  
framework of the sociology of education specifically drawing on Bernstein s 1996 sociological theory of education and his  
pedagogic device This study focuses on the way in which the content of the evaluative rule of the pedagogic device is realised  
in the particular selection of schools My theoretical framework relies on of the work of Davis 2010a 2010b 2010c 2011a  
2011b 2011c 2012 2013a 2013b and Bernstein ibid These theoretical resources were drawn on to describe and analyse the  
mathematical activity in the five schools as well as serving as a means for generating analytical resources for describing the  
constitution of mathematics In my analysis I present an account of the computational activity of teachers and their learners  
and the regulation of mathematical activity in fifteen Grade 8 mathematics lessons I use these descriptions of computational  
activity to discuss the realisation of content against a general background of curriculum reform that has de emphasised  
explicit use of formal definitions I explore what mathematical content was recognised and constituted in relation to topics  
announced by teachers and use the mathematics encyclopaedia as a resource to ascertain the content that substitutes for  
formal mathematical definitions axioms and propositions
