Congress. House. Committee on Appropriations. Subcommittee on State, Foreign Operations, and Related Programs, 2011 *State, Foreign Operations, and Related Programs Appropriations for 2012: Testimony of members of Congress; testimony of interested individuals and organizations* United States. Congress. House. Committee on Appropriations. Subcommittee on State, Foreign Operations, and Related Programs, 2011 *Africa and Global Health Governance* Amy S. Patterson, 2018-03 A timely inquiry into how domestic politics and global health governance interact in

Africa Global health campaigns development aid programs and disaster relief groups have been criticized for falling into colonialist patterns running roughshod over the local structure and authority of the countries in which they work Far from powerless however African states play complex roles in health policy design and implementation In Africa and Global Health Governance Amy S Patterson focuses on AIDS the 2014 2015 Ebola outbreak and noncommunicable diseases to demonstrate why and how African states accept challenge or remain ambivalent toward global health policies structures and norms Employing in depth analysis of media reports and global health data Patterson also relies on interviews and focus group discussions to give voice to the various agents operating within African health care systems including donor representatives state officials NGOs community based groups health activists and patients Showing the variety within broader patterns this clearly written book demonstrates that Africa s role in global health governance is dynamic and not without agency Patterson shows how for example African leaders engage with international groups attempting to maintain their own leadership while securing the aid their people need Her findings will benefit health and development practitioners scholars and students of global health governance and African politics

The Political Economy of Aid and Accountability Helen Tilley, 2016-02-24 The provision of aid is increasingly under scrutiny with increasing demands for results This raises the question what are our expectations from aid and are they realistic Too often accountability is argued for without questioning if what is understood by the term is relevant or applicable The Political Economy of Aid and Accountability The Rise and Fall of Budget Support in Tanzania explores the real meaning of accountability and argues for a new approach to aid more relevant to recipient countries Offering fresh insightful ideas Helen Tilley presents a contemporary theory of accountability through a case study of the delivery of general budget support in Tanzania By considering the wider system of often contradictory political and social relations that influence and in turn constrain donor government relations she questions the traditional understanding of accountability and deconstructs its epistemological assumptions Engaging in an interdisciplinary discussion drawing upon economics sociology political science anthropology psychology and philosophy the book constructs a modern and nuanced understanding of accountability and foreign aid

Public Procurement and Multilateral Development Banks Sope Williams-Elegbe, 2017-03-23. The multilateral development banks cumulatively channel billions of dollars annually in development assistance to borrower countries. This finance is usually spent through processes that incorporate the public procurement regulations of the banks, and it is often a condition of this finance that the funds must be spent using the procurement regulations of the lender institution. This book examines the issues and challenges raised by procurement regulation in the multilateral development banks. The book examines the history of procurement regulation in the banks, the tripartite relationship created between the banks, borrowers, and contractors in funded procurements, the procurement documents and procurement cycle, as well as how the banks ensure competition and value for money in funded procurements. The book also examines the banks' approach to sustainability concerns in public procurement, such as environmental, social, or industrial concerns, as well as how the banks address the issue of corruption and fraud in funded contracts. Another issue that is addressed by this book is how the banks have implemented the aid effectiveness agenda. It will be seen that the development banks have undertaken steps to harmonise their policies and practices, increased borrower procurement capacity, taken steps to reduce the tying of aid, and play an important role in the reform of borrower procurement systems, all in an effort to improve the effectiveness of development finance. The book also considers the contractual and other remedies that are available to parties that may be aggrieved as a result of a funded procurement. The book analyses, compares, and contrasts the legal, practical, and institutional approaches to procurement regulation in the World Bank, the Inter American Development Bank, the African Development Bank, the Asian Development Bank, and the European Bank for Reconstruction and Development.
