stakeholders expectations in each of the journey s three stages The journey begins with the adoption of simple yet powerful systems based tools for managing the organization s operations and projects These proven tools provide increased productivity with a proven bottom line improvement that exceeds 30% This introduction to systems based tools and thinking provides the organization with the time to become more familiar with this new way of thinking and making business decisions before they expand their exposure to broader more complex systems based and sustainable practices The second stage of this journey is focused on introducing new tools and practices to insure a consistent set of measures are used across the organization The third and final stage focuses on aligning the organization s people management practices
