Red Army Auxiliary Armoured Vehicles, 1930-1945 Alexey Tarasov,2021-07-07 During the 1930s in the Soviet Union a remarkable range of auxiliary armoured vehicles were produced for the Red Army which have rarely had the attention they deserve and Alexey Tarasov s photographic history is the ideal guide to them These innovative designs demonstrate the diversity and innovation of the

Soviet arms industry Among them were armoured flails ambulances bridge layers flame throwers and amphibious cars which prefigure similar designs made by western engineers during the Second World War As this selection of rare photographs shows Soviet designers were in many ways ahead of their time and it was short sighted internal policy and the shortcomings of Soviet industry which led to the cancellation or postponement of many of these promising projects As a result when faced with Operation Barbarossa in 1941 the Red Army lacked the auxiliary armour that would have helped to stem the German advance Alexey Tarasov s in depth research and the rare photographs he has assembled give a fascinating insight into a little known aspect of the history of Soviet armoured vehicles *Tanks of the USSR 1917-1945* Alexander Ludeke,2018-01-23 The Soviet Union had already begun building an armored industry as early as the 1920s Although initially limited to reconstructing and developing Western European armored vehicles an independent line of powerful and easy to produce models had been established by 1939 Even after the Second World War the USSR expanded its armament force considerably even planning to cross western Europe in a massive armored wave in the event of any conflict with NATO In this book Alexander L deke looks at all the important Soviet tanks that were built from 1917 up until the end of the Second World War

Russian Tanks of World War II Tim Bean,Will Fowler,2002 At the start of the campaign on the Eastern Front in the earliest days of Operation Barbarossa it was the German armour that swept all in front of it as the Wehrmacht drove eastwards in an unrelenting advance on Leningrad Moscow and Stalingrad The ill prepared and under resourced Russian forces were forced to retreat Gradually the balance of the war swung in favour of the Russian forces whose strength both in numbers and equipment proved decisive in the ultimate defeat of the German forces in the east Critical in the Soviet victory was its armour tanks such as the T 34 proving the equal if not better than some of the tanks available to the Germans This authoritative history of the Soviet forces before and during World War 2 reveals the development of their tactics in the early post revolutionary era right through to the ultimate victory in Berlin in May 1945 The dramatic struggle of the tank crews against the German advance is told through some 200 contemporary photographs many of which have never been seen before The photographs include images of tank training in the 1920s and 1930s on active service and many compelling pictures from some of the major tank battles of the day Over the past five years aided by the opening up of archives in Russia previously closed to western experts there has been a massive growth in interest in the events that occurred on the Eastern Front Russian Tanks is an important addition to the literature currently available exploring as it does the vitally important Soviet armour of the period *US Cold War Tanks and Armoured Fighting Vehicles* Michael Green,2020-11-12 This expert study of the U S military s armored vehicles deployed during the Cold War features rare photographs from the wartime archives To counter the Soviet threat and that of their client States during the Cold War years 1949 1991 the American military deployed an impressive range of main battle tanks and armored fighting vehicles Expert author Michael Green presents a detailed study of these vehicles and their variants in this informative volume of stunning wartime photographs The
