International Responses to Gendered-Based Domestic Violence Dongling Zhang, Diana Scharff Peterson, 2023-03-23 This edited volume represents a joint effort by international experts to analyze the prevalence and nature of gender based domestic violence across the globe and how it is dealt with at both national and international levels With studies being conducted in 20 different countries and 4 distinct regions the contributors to this volume shed light on the ways in which contextual particularities shape the practices and strategies of addressing the socio cultural and legal problem of gender based domestic violence in the countries or regions where they do research Special attention is devoted to developing countries where there is a lack of a consistent legal definition of gender based domestic violence and where violence against women is widely considered a private matter The authors of the chapters share a common goal of raising public awareness of the significance in nuanced local experiences of women and other individuals from gender and sexual minority groups facing gender based violence Furthermore the authors attend analytically to the newly emerging overlapping influences of COVID 19 and global warming Their research findings acknowledge and provide a detailed account of how the two ecological and socio economic crises can combine to produce economic devastation disconnect victims from necessary social services and assistance and create a large degree of panic and uncertainty In addition they intend to offer insights into next steps to not only adjust existing public policies legislation and social services to the ever changing national and global contexts but also to make new ones The book is intended for a wide range of scholars both professors and students and practitioners in a large number of areas including but not limited to criminal justice criminology law human rights social justice social work nursing sociology and political or public affairs

In a Dark Wood Alston Chase, 2017-07-12 *In a Dark Wood* presents a history of debates among ecologists over what constitutes good forestry and a critique of the ecological reasoning behind contemporary strategies of preservation including the Endangered Species Act

Chase argues that these strategies in many instances adopted for political rather than scientific reasons fail to promote biological diversity and may actually harm more creatures than they help At the same time Chase offers examples of conservation strategies that work but which are deemed politically incorrect and ignored In a Dark Wood provides the most thoughtful and complete account yet written of radical environmentalism And it challenges the fundamental but largely unexamined assumptions of preservationism such as those concerning whether there is a balance of nature whether all branches of ecology are really science and whether ecosystems exist In his new introduction Chase evaluates the response to his book and reports on recent developments in environmental science policy and politics In a Dark Wood was judged by a recent national poll to be one of the one hundred best nonfiction books written in the English language during the twentieth century A smashing good read this book will be of interest to environmentalists ecologists philosophers biologists and bio ethicists and anyone concerned about ecological issues

Story of Testosterone, the Hormone that Dominates and Divides Us Carole Hooven, 2021-07-13 Through riveting personal stories and the latest research Harvard evolutionary biologist Carole Hooven shows how testosterone drives the behavior of the sexes apart and how understanding the science behind this hormone is empowering for all Since antiquity from the eunuchs in the royal courts of ancient China to the booming market for elixirs of youth in nineteenth century Europe humans have understood that typically masculine behavior depends on testicles the main source of testosterone in males Which sex has the highest rates of physical violence hunger for status and desire for a high number of sex partners Just follow the testosterone Although we humans can study and reflect on our own behavior we are also animals the products of millions of years of evolution Fascinating research on creatures from chimpanzees to spiny lizards shows how high testosterone helps males out reproduce their competitors And men are no exception While most people agree that sex differences in human behavior exist they disagree about the reasons But the science is clear testosterone is a potent force in human society driving the bodies and behavior of the sexes apart But as Hooven shows in T it does so in concert with genes and culture to produce a vast variety of male and female behavior And crucially the fact that many sex differences are grounded in biology provides no support for restrictive gender norms or patriarchal values In understanding testosterone we better understand ourselves and one another and how we might build a fairer safer society

Douglas, 2010-12-21

Women today are inundated with conflicting messages from the mass media they must either be strong leaders in complete command or sex kittens obsessed with finding and pleasing a man In *The Rise Of Enlightened Sexism* Susan J Douglas one of America s most entertaining and insightful cultural critics takes readers on a spirited journey through the television programs popular songs movies and news coverage of recent years telling a story that is nothing less than the cultural biography of a new generation of American women Revisiting cultural touchstones from *Buffy the Vampire Slayer* to *Survivor* to *Desperate Housewives* Douglas uses wit and wisdom to expose these images of women as mere fantasies of female power assuring women and girls that the battle for equality has been won so there s nothing wrong with resurrecting sexist stereotypes all in good fun of course She shows that these portrayals not only distract us from the real world challenges facing women today but also drive a wedge between baby boom women and their millennial daughters In seeking to bridge this generation gap Douglas makes the case for casting aside these retrograde messages showing us how to decode the mixed messages that restrict the ambitions of women of all ages And what makes *The Rise Of Enlightened Sexism* such a pleasure to read is Douglas s unique voice as she blends humor with insight and offers an empathetic and sisterly guide to the images so many American women love and hate with equal measure **Seduction** Rachel O'Neill, 2018-06-28

Within the so called seduction community the ability to meet and attract women is understood as a skill which heterosexual men can cultivate through practical training and personal development Though it has been an object of media speculation and frequent sensationalism for over a decade this cultural formation remains poorly understood In the first book length study of the industry Rachel O Neill takes us into the world of seduction seminars training events instructional guidebooks and video tutorials Pushing past established understandings of pickup artists as pathetic pathological or perverse she examines what makes seduction so compelling for those drawn to participate in this sphere *Seduction* vividly portrays how the twin rationalities of neoliberalism and postfeminism are reorganising contemporary intimate life as labour intensive and profit orientated modes of sociality consume other forms of being and relating It is essential reading for students and scholars of gender sexuality sociology and cultural studies as well as anyone who wants to understand the seduction industry s overarching logics and internal workings **Feminism, Media, and the Law** Martha Fineman, Martha T.
