the only thing that hearing aids were able to do was give some amplification which can help in some cases of Tinnitus but may not be able to help in all situations The solution I found has been available for about a year and half at this point It does this by masking the sound of Tinnitus you are hearing With technology being in a constant state of evolvement things will only get better Maybe someday there will be a cure for Tinnitus for today we can at least treat the symptom These are just my experiences The results you experience may be different from mine It is my hope that in reading my book is that it will save you some of the research that I have had to go through For more information please visit <https://www.amazon.com/author/ronaldnutter>
