Ieder zijn eigen Arnon Grunberg Dolores Ross, Marleen Mertens, 2012 De bundel documenteert op een vergelijkende manier de vrijwel synchrone dynamiek van vertaling promotie en receptie van n bepaalde auteur in vijf samenhangende taalgebieden belangrijke exponenten van de Romaanse taalfamilie gedurende de periode 1996-2009 Er is gekozen voor een interdisciplinaire aanpak waar taal literatuur en cultuur elkaar ontmoeten en literatuur en vertaalsociologische factoren worden gecombineerd met inzichten uit de vertaal literatuur en boekwetenschap Centraal staat daarbij de poging een brug te slaan tussen theorie en praktijk *Tirza* Arnon Grunberg, 2009 Op de avond van het eindexamenfeestje van zijn

1 Joanna Witkowska, Uwe Zagratzki, 2014-10-16 The effects of 9/11 ramify through a network of conduits and pathways including the examples of expressive culture this volume explores and the registration of those effects will likewise be felt in an array of documents and texts The cultural literary and mass mediated effects of 9/11 encompass the globe and the chapters in this volume assume a transnational and international range of vantage points The topics examined include the representation of Islam and Moslems in a number of texts and genres the political and psychological dilemmas faced by characters in a number of literary works and the refraction of current psycho cultural political tensions in forms of expressive culture in which the effects of 9/11 are felt in other than explicit ways Was 9/11 a moment that punctuated and disrupted the movement of history or as one of the authors suggests did it act as a catalyst to escalate existing stereotypes The chapters investigate not just different genres and cultural forms but distinct modes of intersection between the political the cultural and the psychological One achievement of this volume is to show how 9/11's effects at times insinuate themselves in discourse through nuance and subtlety and at other times frontally assault texts and images In the words of one article modern Dutch post 9/11 novels directly participate in current cultural and political discourses By the same token these cultural and political discourses participate in novels films TV shows and the effects of 9/11 proliferate and concentrate in this exchange This volume draws timely attention to the multiple forms of this complex interaction Dr Patrick Hagopian

University of Lancaster On Psychoanalysis, Disillusion, and Death Antonie Ladan, 2014-02-24 For some years now psychoanalysts have been trying to understand the implications of neuroscientific findings for psychoanalytic theory and practice In On Psychoanalysis Disillusion and Death Antonie Ladan looks at how findings from neuroscience and memory research can inform our understanding of some of the most important psychoanalytic concepts such as transference and unconscious fantasy Central to the book are the dead certainties that to a great extent determine how we lead our lives Antonie Ladan argues that these certainties are too self evident to be seen as invisible as the air we breathe He shows how in our associations with others we are in large measure guided by dead certain relational patterns of which we are not conscious but that remain implicit Using clinical examples Ladan illustrates how a specific form of observation where the analysand and the analyst pay careful attention to their relationship over an extended period of time makes it possible to gradually recognise these automatic expectations and behaviours in relational situations On Psychoanalysis Disillusion and Death explores how the psychoanalyst can bring the implicit patterns within which analysands find themselves trapped to their attention enabling them to look at the world from a disillusioning perspective in order to accept life and the prospect of death for what they are This book will be of interest to psychotherapists analytical psychologists psychoanalysts therapists and students **Literary Prizes and Cultural Transfer** Petra Broomans, Mathijs Sanders, Jeanette den Toonder, Elise Bijl, 2022-02-05 Literary Prizes and Cultural Transfer addresses the multilevel nature of literary and translation prizes with the aim of expanding our knowledge about them as an international and transnational phenomenon The contributions to this book analyse the social institutional and ideological functions of such prizes This volume not only looks at famous prizes and celebrities but also lesser known prizes in more peripheral language areas and regions with a special focus on cultural transmitters and their networks which play a decisive role in the award industry Cultural transfer and translations are at the heart of this book and this approach adds a new dimension to the study of literary and translation prizes The contributions reveal the diverse ways in which a cultural transfer approach enhances the study of literary prizes presenting the state of the art regarding recent developments in the field Articles with a broader scope discuss definitions concepts and methods while other contributions deal with specific case studies A variety of theoretical and methodological approaches are explored applying field theory network analysis comparative literature and cultural transfer studies By providing multiple perspectives on the literary prize this volume aims to contribute to our knowledge and understanding of this intriguing phenomenon

Character Constellations Roel Smeets, 2021-11-15 Fiction has a major social impact not least because it co shapes the image that society has of various social groups Drawing on a collection of 170 contemporary Dutch language novels Character Constellations presents a range of data driven statistical models to study depictions of characters in terms of gender race ethnicity class age sexuality and other identity categories Incorporating the tools of network analysis each chapter highlights an aspect of fictional social networks that affects the representation of social groups their centrality their

communities and their conflicts While reading individual novels in light of emerging statistical patterns combining the formal methods of social network analysis with the interpretive tools of narratology this study shows how central societal themes such as in equality and emancipation integration and segregation and social mobility and class struggle are foregrounded replicated or distorted in the Dutch novel Showcasing what character based critiques of literary representation gain by integrating data driven methods into the practice of critical close reading Character Constellations contributes to societal debates on cultural representation and identity and the role
