

- SAE 30** This oil is satisfactory in tropical climates where the temperature range will frequently rise above 30° C (86° F).
- SAE 20 W/20** engine oil is recommended for use within the mild temperature range from 30° C to 0° C (86° F—32° F). It may also be used with safety, should temperatures temporarily rise or fall below these limits.
- SAE 10 W** engine oil is recommended when it is anticipated that the temperature will fall below 0° C (32° F). It may also be used with safety should temperatures rise above freezing point. A change of oil is, therefore, not necessary until the next regular mileage interval.
- SAE 5 W** This extremely light engine oil is for use in arctic climates only.

Multigrade Oils

are HD oils which cover several viscosity grades, such as SAE 10 W/30 for example. These oils are also suitable for VW engines.

In some countries the API Classification is applied (API — American Petroleum Institute). According to this classification, the oils suitable for the VW Industrial Engine are referred to as "For Service MS".

The Governor

should be oiled at the intervals indicated in the Lubrication Chart. Screw out the oil level control screw and add oil until the level reaches the lower edge of the control screw hole. After completing the lubrication, make sure that the cap of the lubrication fitting is properly closed, as dirt and grit in the governor will cause premature wear.
