Linarez V. United States Department of Justice, Drug Enforcement Administration ,1992 **Ward's Automotive Yearbook** ,1938 Includes advertising matter **Cleaning Up Greenwash** Angus Nurse,2022-02-25 A 2022 Choice Reviews Outstanding Academic Title Through a green criminological perspective Angus Nurse examines the contemporary reality of corporate environmental crime and illegal activities that have become normalized within many major corporations Arguably this is an inevitable consequence of a corporate culture that prioritizes profits and the smooth operation of market activities over environmental concerns coupled with the increased political power of major corporations that can act almost with impunity and where problems do occur can literally buy itself out of trouble These same corporations are broadly perceived as being responsible actors However Nurse argues that corporate environmental offending is often deliberate and that corporations understand that they will often be allowed to continue with polluting and non compliant behavior because the likely enforcement responses are fines and settlements rather than criminal prosecution Using several case studies Nurse explores biopiracy and the rights of indigenous peoples the behavior of oil companies in African states the regulation of corporate social responsibility and corporate environmental responsibility an analysis of contemporary environmental legislation and the prosecution of environmental harm and state corporate crime and air pollution Dealing with these problems requires a wider notion of crime and wrongdoing that directly engages with the types of environmental offending that represent a threat to human populations and non human nature irrespective of whether these are defined as crime by justice systems Developing International Strategies Rudolf Grünig,Dirk Morschett,2011-10-22 The internationalization of the human society and mainly of the economy will continue It will create threats but also big opportunities to most companies This is where the book makes its contribution putting forward suggestions for medium sized companies to become a winner of internationalization After a comprehensive introduction to internationalization and to strategic planning concrete recommendations are made The book first looks at going international

for new markets Then it shows how to develop an internationalization strategy for production and sourcing Finally strategic planning in an international company is explained The book is aimed at company executives master students and participants of EMBA programs It is intended to serve as a support for developing successful strategies for going and being international
