Gums, Adhesives & Sealants Technology (with Formulae & their Applications) 2nd Edition NIIR

Board, 2010-01-02. Naturally occurring polysaccharides from plant exudates have been in use from many decades in immense quantities. Natural gums are natural polymers which mainly consist of carbohydrates, sometimes with small amounts of proteins and minerals. Gum and its derivatives are widely used in various industries as per its needs. The appearance and properties of natural gums determine their commercial value and end use. Due to their extraordinary unrivalled technological functional properties, gum is used in many industries. Gums not only modify viscosity and consistency; they also often attenuate odour, taste and flavour intensity. Adhesive or sealant is a mixture in a liquid or semi liquid state that is capable of holding materials together by surface attachment. Adhesives and sealants are used as a raw material for the manufacturing industry or for the service of different processing industries. Adhesives and sealants virtually touch every part of our lives. The adhesives and sealants are two chemically similar but functionally different groups of formulated products. There is no end in sight to the new materials, new formulation and new uses to which adhesives and sealants will be put in the future. Some of the fundamentals of the book are: advantages of adhesive bonding, hybrids and coupling agents, adhesive films, designing polymers for adhesives, fundamentals of adhesion, designing polymers for adhesives, thermodynamics of adhesion, casein and mixed protein adhesives, lime free casein adhesives, foil to paper laminating adhesives, casein and protein blend glues, as wood adhesives, chemistry of protein blend glues, natural rubber adhesives, vulcanizing latex adhesives, solution adhesives from natural rubber, halogenated butyl rubber, butyl rubber and poly isobutylene lattices, polysulfide sealants and adhesives etc. This book covers a wide range of polymeric adhesives and sealants, gums along with their essential formularies distinguished by applications and based on technology.
