

Basketball

Courtside Chronicles

Upon the court, where sneakers squeak and slide,
The ball in flight, hopes soaring just as high.
Each pass and play, an artistry inside,
A dance of fierce resolve beneath the sky.

Defenders leap, their shadows merge and twist,
Offense with skill, they weave and they persist.
The clock ticks down, each second does insist,
A shot is made, a moment not to be missed.

From start to end, the players tell a tale,
Of sweat, of dreams, of wins, and some fails.
But in each game, their spirits never frail,
For in their heart, the love for hoops prevails.

Hammerness, 2006-01-01 What sources of inspiration help sustain teachers' commitments, motivations and care for their work How do teachers use their ideals to inform their practice and their learning The author proposes that many teachers have images of ideal classroom practice which she calls teachers' vision In this book Karen Hammerness uses vision to shed light

on the complex relationship between teachers' ideals and the realities of school life. Through the compelling stories of four teachers, she reveals how each educator can help new teachers articulate, develop, and sustain their visions and assist them as they navigate the gap between their visions and their daily work. She shows us how vision can illuminate those emotional and passionate moments in the classroom that enrich and enliven their work as teachers explain what teachers learn about their students, their teaching, and their schools, and reveal why some teachers choose to stay in teaching and others leave the profession.

The Day the Universe Exploded My Head Allan Wolf, 2019-03-05. Hang on tight for a raucous bounce through the solar system and back propelled by funny, fanciful, factually sound poems and exuberant illustrations. The universe poured into me. My brain was overloaded. It smoked and glowed red hot. And then it actually exploded. Ever wonder what the sun has to say about being the closest star to Earth? Or what Pluto has gotten up to since being demoted to a dwarf planet? Or where rocket ships go when they retire? Listen closely because maybe just maybe your head will explode too. With poetry that is equal parts accurate and entertaining and illustrations that are positively out of this world, this book will enthrall amateur stargazers and budding astrophysicists as it reveals many of the wonders our universe holds. Space travelers in search of more information will find notes about the poems, a glossary, and a list of resources at the end.
