Key Technologies

BRAVIA Engine™ Video Processing System BRAVIA™ S-Series LCD televisions use Sony's BRAVIA Engine™ full digital video processor for crisp and clear images. Several special picture enhancement technologies are integrated into the processor to create better gradations with more detail, sharper contrast, and dynamically improve color performance.

•Digital Noise Reduction Circuit: Reduces block noise and mosquito noise by using pixel-level filtering to reproduce a clean and clear picture. And Motion InterColor Reduction reduces just the noise in the video signal for wider picture without unwanted noise and blur artifacts.

•Digital Contrast Enhancer circuit: Improves contrast by extracting all areas from dark to bright in parallel with feature control providing a three dimensional picture.

•Color Reality signal processing enables the expression of all the colors of life in vivid detail for dark and bright scenes. Details in dark areas of the picture and there, just like they are supposed to be.

Live Color Creation featuring WCG-CCFL Live Color Creation is a special Sony function that achieves precise, wide color reproduction using a combination of advanced chroma signal processing algorithms. A special wide color gamut backlight (WCG-CCFL) is coupled with Sony's Live Color Creation circuitry. The benefit is clear blues, natural greens and overall vibrant colors in all scenes.

CrossMedia Bar (CMB™) On-Screen Menu System Cross Media Bar is Sony's "Living Area"™ featuring on-screen navigation that provides quick access to various set up functions and features. For instance, selecting different types of media is made fun and easy by scrolling horizontally across icons until you find the type of media you are looking for. After selecting the media type, a list of its content appears as vertical thumbnails. Key set up menus and features work the same way. The main benefit of the CMB™ is that users can navigate through on-screen menus without taking their eyes off of their TV.

DMR™ Compatibility DMR™ compatibility allows the connection and operation of a whole new category of products that is being developed by Sony (sold separately). The first of these products is the optional BRAVIA™ Internet Video Link module.

BRAVIA Theatre™ Sync BRAVIA Theatre™ Sync reduces the hassle and time consuming job of powering up, changing the signal setting, and adjusting other functions to the simple push of one button. All you need to do is to connect BRAVIA Theatre Sync capable products to each other via one HDMI cable. The rest is easy. For instance, the One Push Play function activates by touching the play button on the remote and BRAVIA Theatre Sync takes over from there. The BRAVIA Home Theatre System and Ti turn on, the DVD input on the BRAVIA Theatre system and TV activates. The TV mutes. And finally the DVD plays. There are two other BRAVIA Theatre Sync functions - One Push Theatre Settings, which provides optional picture and sound settings for movies and One Push System Shut Down for turning off the entire home entertainment system.

BRAVIA Internet Video Link The first DMR™ product to be introduced to the market is the DMX-W1 BRAVIA Internet Video Link module (sold separately). BYVL, as it is affectionately called, can stream available Internet video from select content providers directly to your TV with a broadband connection is what they need for a PC.

S-Force Front Surround S-Force™ Front Surround is a virtual surround sound experience made possible using just two front speakers. To select BRAVIA modes, to accomplish this, Sony spent several years studying how earbats work. By understanding exactly how we recognize the origin, direction, volume and timing differences in sound right and left ear, Sony was able to create complex audio processing that delivers dynamic virtual surround sound without the need to become bored off walls and back to the listener.

HDMI™ and PC Connectivity Designed for maximum versatility, Sony's BRAVIA S-Series Digital LCD TV line is equipped with a comprehensive range of input interfaces. The HDMI high-definition multimedia interface is the first industry supported, uncompressed, all-digital audio/video interface. HDMI technology supports enhanced or High Definition video, together with multi-channel digital audio to provide matchless image and sound reproduction. The HDMI and PC inputs (HD-SDI) offer easy connection to your PC, allowing you to use your high resolution BRAVIA S-Series Digital TV as a computer monitor.
