Crime of Numbers Fuat Dunder,2011-12-31 Statistics have played an important role in the recognition of the Armenian question on the international landscape as well as its definitive solution resulting in the Armenian genocide The importance of statistics first surfaced at the Congress of Berlin in 1878 where differences in the approach toward numbers between the Armenian and the Ottoman Empire and the role of statistics within the Ottoman state apparatus became an issue At that international gathering the Armenian question was considered part of the Eastern Question paradigm of Western diplomacy It would soon become a code word for the question of civilization itself Those administering the multi ethnic Ottoman Empire perceived the Armenian issue not only through ethnic and religious perspectives but also through statistics As Dunder shows statistics became the vehicle through which the Ottoman state apparatus was forced to include non Muslim populations of the Empire in the state apparatuses and local councils This occurred long before the Armenian question surfaced The aim of Ottoman reforms was to ensure that all communities participated in the affairs of the state and that such participation was proportionate to their numbers Through its role in these reforms statistics emerged as a constant matter of debate in the Armenian question As a result of the Armenian genocide the statistical record has become quite sensitive Today accounting

for the numbers of Armenians murdered in 1915 usually means calculating the number of Armenians who were massacred or died of other causes such as disease hunger exhaustion and the like during deportations or immediately after This is a work of brilliant archival history and imaginatively uses social statistics *The American in Paris* Jules Janin, 1844
