Split into three parts dedicated to specific themes, the first part of the book, *Military Psychology: The Roots and the Journey*, provides an overview of the evolution of the discipline over the years delving into concepts as varied as culture and cognition in the military, a perspective on the role of military psychology in future warfare and ethical issues. The second part, *Soldiering, Deployment and Beyond*, considers the complexities involved in soldiering in view of the changing nature of warfare, generating a focal discourse on various aspects of military leadership, soldier resilience and post-traumatic growth in the face of extreme situations, bravery and character strengths and transitioning to civilian life. In the final section, *Making a Choice: Mental Health Issues and Prospects in the Military*, the contributors focus on the challenges and practices involved in maintaining the mental health of the soldier, covering issues ranging from stress, mental health and well-being through to suicide risk and its prevention, intervention and management strategies, moral injury and post-traumatic stress disorder. Incorporating enlightening contributions of eminent scholars from around the world, the volume is a comprehensive repository of current perspectives and future directions in the domain of military psychology. It will prove a valuable resource for mental health practitioners, military leaders, policy makers and academics and students across a range of disciplines.

Military Strategy of Middle Powers Håkan Edström, Jacob Westberg, 2020-10-15
Military Strategy of Middle Powers explores to what degree twenty-first century middle powers adjust their military strategies due to changes in the international order such as the decline in US power. The overarching objective of the book is to explain continuity and change in the strategies of a group of middle powers during the twenty-first century. These strategies are described, compared and explained through the lens of Realism. In order to find potential explanations for change or continuity within the cases as well as for similarities and differences between the cases, the strategies of 11 middle powers are analysed: Canada, Germany, Italy, Spain, Australia, Brazil, Indonesia, South Africa, India, Japan and South Korea. This group of countries are considered similar in several important aspects, primarily regarding relative power capacity. When searching for potential explanations for different strategic behaviours among the middle powers, their unique regional characteristics are a key focus and consequently the impact of the structure and polarity as well as the patterns of amity and enmity of the regional context are analysed. The empirical investigation is focused on security strategies used since the
