Democracy Under Siege? Timothy Hellwig, Yesola Kweon, Jack Vowles, 2020-06-29 The Global Financial Crisis of 2008 2009 was catalyst for the most precipitous economic downturn in eight decades This book examines how the GFC and ensuing Great Recession affected electoral politics in the world's developed democracies The initial wave of research on the crisis concluded it did little to change the established relationships between voters parties and elections Yet nearly a decade since the initial shock the political landscape has changed in many ways the extent to which has not been fully explained by existing studies Democracy Under Siege pushes against the received wisdom by advancing a framework for understanding citizen attitudes preferences and behaviour It makes two central claims First while previous studies of the GFC tend to focus on an immediate impact of the crisis Hellwig Kweon and Vowles argue that economic malaise has a long lasting impact In addition to economic shock the economic recovery has a significant impact on citizens assessment of political elites Second the authors argue that unanticipated exogenous shocks like the GFC grants party elites an opening for political manoeuvre through public policy and rhetoric As a result political elites have a high degree of agency to shape public perceptions and behaviour Political parties can strategically moderate citizens economic uncertainty mobilise demobilise voters and alter individuals political preferences By leveraging data from over 150 000 individuals across over 100 nationally representative post election surveys from the 1990s to 2017 this book shows how economic change during a tumultuous era affected economic perceptions policy demands political participation and the vote The Comparative Study of Electoral Systems CSES is a collaborative program of research among election study teams from around the world Participating countries include a common module of survey questions in their post election studies The resulting data are deposited along with voting demographic district and macro variables The studies are then merged into a single free public dataset for use in comparative study and cross level analysis The set of volumes in this series is based on these CSES modules and the volumes address the key theoretical issues and empirical debates in the study of elections and representative democracy Some of the volumes will be organized around the theoretical issues raised by a particular module while others will be thematic in their focus Taken together these volumes will provide a rigorous and ongoing contribution to understanding the expansion and consolidation of democracy in the twenty first century Series editors Hans Dieter Klingemann and Ian McAllister **Journal**

Summary of World Broadcasts, 2000 *Daily Report*, 1984-08 Japan, South Korea, and the United States Nuclear Umbrella Terence Roehrig, 2017-09-19

For close to sixty years the United States has maintained alliances with Japan and South Korea that have included a nuclear umbrella guaranteeing their security as part of a strategy of extended deterrence Yet questions about the credibility of deterrence commitments have always been an issue especially when nuclear weapons are concerned Would the United States truly be willing to use these weapons to defend an ally In this book Terence Roehrig provides a detailed and comprehensive look at the nuclear umbrella in northeast Asia in the broader context of deterrence theory and U S strategy He examines the role of the nuclear umbrella in Japanese and South Korean defense planning and security calculations including the likelihood that either will develop its own nuclear weapons Roehrig argues that the nuclear umbrella is most important as a political signal demonstrating commitment to the defense of allies and as a tool to prevent further nuclear proliferation in the region While the role of the nuclear umbrella is often discussed in military terms this book provides an important glimpse into the political dimensions of the nuclear security guarantee As the security environment in East Asia changes with the growth of North Korea's capabilities and China's military modernization as well as Donald Trump's early pronouncements that cast doubt on traditional commitments to allies the credibility and resolve of U S alliances will take on renewed importance for the region and the world
