Science Education Research Kaisa Hahl, Kalle Juuti, Jarkko Lampiselkä, Anna Uitto, Jari Lavonen, 2017-07-10 This edited volume brings forth intriguing novel and innovative research in the field of science education The chapters in the book deal with a wide variety of topics and research approaches conducted in various contexts and settings all adding a strong contribution to knowledge on science teaching and learning The book is comprised of selected high quality studies that were presented at the 11th European Science Education Research Association ESERA Conference held in Helsinki Finland from 31 August to 4 September 2015 The ESERA science education research community consists of professionals with diverse disciplinary backgrounds from natural sciences to social sciences This diversity provides a rich understanding of cognitive and affective aspects of science teaching and learning in this volume The studies in this book will invoke discussion and ignite further interest in finding new ways of doing and researching science education for the future and looking for international partners for both science education and science education research The twenty five chapters showcase current orientations of research in science education and are of interest to science teachers teacher educators and science education researchers around the world with a commitment to evidence based and forward looking science teaching and learning

Voluminous States Franck Billé, 2020-07-24 From the Arctic to the South China Sea states are vying to secure sovereign rights over vast maritime stretches undersea continental plates shifting ice flows airspace and the subsoil Conceiving of sovereign space as volume rather than area the contributors to Voluminous States explore how such a conception reveals and underscores the three dimensional nature of modern territorial governance In case studies ranging from the United States Europe and the Himalayas to Hong Kong Korea and Bangladesh the contributors outline how states are using airspace

surveillance maritime patrols and subterranean monitoring to gain and exercise sovereignty over three dimensional space Whether examining how militaries are digging tunnels to create new theaters of operations the impacts of climate change on borders or the relation between borders and nonhuman ecologies they demonstrate that a three dimensional approach to studying borders is imperative for gaining a fuller understanding of sovereignty Contributors Debbora Battaglia Franck Bill Wayne Chambliss Jason Cons Hilary Cunningham Scharper Klaus Dodds Elizabeth Cullen Dunn Gast n Gordillo Sarah Green Tina Harris Caroline Humphrey Marcel LaFlamme Lisa Sang Mi Min Aihwa Ong Clancy Wilmott Jerry Zee *Life after Gravity* Patricia Fara,2021-02-24 The story of Isaac Newton s decades in London as ambitious cosmopolitan gentleman President of London s Royal Society Master of the Mint and investor in the slave trade Isaac Newton is celebrated throughout the world as a great scientific genius who conceived the theory of gravity But in his early fifties he abandoned his life as a reclusive university scholar to spend three decades in London a long period of metropolitan activity that is often overlooked Enmeshed in Enlightenment politics and social affairs Newton participated in the linked spheres of early science and imperialist capitalism Instead of the quiet cloisters and dark libraries of Cambridge s all male world he now moved in fashionable London society which was characterized by patronage relationships sexual intrigues and ruthless ambition Knighted by Queen Anne and a close ally of influential Whig politicians Newton occupied a powerful position as President of London s Royal Society He also became Master of the Mint responsible for the nation s money at a time of financial crisis and himself making and losing small fortunes on the stock market A major investor in the East India Company Newton benefited from the global trading networks that relied on selling African captives to wealthy plantation owners in the Americas and was responsible for monitoring the import of African gold to be melted down for English guineas Patricia Fara reveals Newton s life as a cosmopolitan gentleman by focussing on a Hogarth painting of an elite Hanoverian drawing room Gazing down from the mantelpiece a bust of Newton looms over an aristocratic audience watching their children perform a play about European colonialism and the search for gold Packed with Newtonian imagery this conversation piece depicts the privileged exploitative life in which this eminent Enlightenment figure engaged an uncomfortable side of Newton s life with which we are much less familiar
