Financial Management for Hospitality Decision Makers Chris Guilding, 2007-08-22 *Financial Management for Hospitality Decision Makers* is written specifically for those decision makers in the industry who need to be able to decipher accountant speak and reports in order to use this information to its best advantage and achieve maximum profits. The area of accounting and finance is a vital but often inaccessible part of the hospitality business. However, having the knowledge and the ability to use it properly makes all the difference to the turnover and success of a business. *Financial Management for Hospitality Decision Makers* is written specifically for those industry executives who need to be able to decipher, appreciate and utilise valuable financial management tools and techniques in order to realise maximum profits. Highly practical in its scope and approach, this book outlines the procedure and purpose behind various financial activities including budgeting, year-end financial statement analysis, double entry accounting, managing and analysing costs, working capital management and investment decision making. Demonstrates how an appropriate analysis of financial reports can drive your business strategy forward from a well-informed base. Clearly highlights the key financial issues you need to consider in a host of decision-making situations. Includes a range of problems to help readers appraise their understanding of concepts with solutions provided for lecturers at <http://textbooks.elsevier.com>. At all times, the book rigorously applies itself to the specific needs of the hospitality decision maker, contextualising and explaining financial decision making and control in this light. Combining a user-friendly structure with frequent international cases, worked examples and sample reports to illuminate the theory, *Financial Management for Hospitality Decision Makers* is ideal for all students of hospitality as well as being a vital source of information for practitioners already in the industry.

Handbook of Accounting and Development Trevor Hopper, 2012-01-01 The *Handbook of Accounting and Development* examines the major areas of accounting and development: financial reporting, management control, taxation, education in both the public and private sectors. The four editors have written two of the chapters, including the Introduction, which is more substantial and useful than an average introduction. The remaining 14 chapters are contributed by 22 distinguished authors who work in nine different countries. The quality of the writing is high throughout. The *Handbook* should be warmly welcomed by policy makers and academics, especially those of us who have not paid enough attention to such matters in the past. Christopher Nobes, Royal Holloway University of London, UK. Trevor Hopper and his colleagues provide a central point of reference for research into accounting and development. Definitive chapters from internationally recognised authors including Marcia Annisette, Kerry Jacobs, Chris Poullaos, Brendan O'Dwyer, Chibuike Uche and Jeffrey Unerman cover the full range of issues from the role of capital markets in development through accounting professionalization to taxation and transfer pricing. Contributions from authors working for donors and non-governmental organisations provide a useful practical dimension that builds on the more academic chapters. Christopher Napier, Royal
