S. Harris,2014-02-25 First published in 1980 This book is the first integrated presentation of two of the most active areas in present day visual research Its inspiration and nucleus were provided by two Optical Society of America symposia one on the coding of spatial information in the visual system and the other on adaptability of the visual system Although the two topics might seem at first sight only distantly related they are actually extensively intertwined in contemporary research Some investigators focus on mechanisms of visual analysis but rely on experimental modification of perception to reveal the nature of the coding others focus on perceptual modification but look at analytic elements for indications about what it is that gets modified Likewise most of the chapters in this book combine in varying proportions both themes Adult human perception is the primary concern but illuminating data from animal infant and neurophysiological studies are also discussed *Bibliography of Agriculture* ,1990 **Bibliography of Agriculture with Subject Index** ,1990 *New York Magazine* ,1979-10-08 New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country With award winning writing and photography covering everything from politics and food to theater and fashion the magazine s consistent mission has been to reflect back to its audience the energy and excitement of the city itself while celebrating New York as both a place and an idea **Cumulated Index Medicus** ,1990 *Bibliography of Agriculture* ,1990-12 *Biological & Agricultural Index* ,1993
