Spanish Fluency Kindergarten:

SYSTEMATIC INSTRUCTION IN READING FOR SPANISH-SPEAKING STUDENTS Elva Duran, 2013-04-01 Students whose first language is not English are the fastest growing group in public schools in all regions of the United States. Almost 10 million children between the ages of five and 17 live in the homes and communities in which a language other than English is spoken and presently most schools in the U.S. are educating many English learners. The achievement of Hispanic students needs to improve dramatically over the next five years and this book describes the cornerstone elements for bringing about this change. The initial chapter introduces direct instruction to be used with reading and literacy programs. Chapters 2 and 3 provide excellent review of the literature in language development and address developing language instruction: listening and speaking with Spanish-speaking students and offers what a comprehensive language development program should look like. Chapter 4 reviews academic language and literacy instruction while the next addresses the components of instruction in Spanish. Chapter 6 offers lesson plan suggestions for Spanish-speaking students while the following two sections discuss components that transfer and do not transfer in Spanish to English reading instruction. Chapter 9 reviews English language development and provides lesson plans for implementing SDAIE programs. Finally, Chapter 10 discusses two-way bilingual immersion and shares actual classroom schedules and lessons. This unique text will help in the preparation of primary grade teachers throughout the U.S. so that they may be successful with Hispanic students entering the public schools with little or no English background. It will also be a useful tool for school districts staff development in addressing school improvement goals for increasing the achievement of Hispanic students. **Language Processing in Bilingual Children** Ellen Bialystok, 1991-05-09 A collection of papers that explore bilingual children coping with two language systems. **Kindergarten Transition and Readiness** Andrew J. Mashburn, Jennifer LoCasale-Crouch, Katherine C. Pears, 2018-06-09 This book presents a comprehensive overview of children's transitions to kindergarten as well as proven strategies that promote their readiness. It presents theories and research to help understand children's development during the early childhood years. It describes evidence-based interventions that support children in developmental areas essential to school success including cognitive, social, emotional, and self-regulatory skills. Chapters review prekindergarten readiness programs designed to promote continuity of learning in anticipation of the higher grades and discuss transitional concerns of special populations such as non-native speakers, children with visual and other disabilities, and children with common temperamental issues. The volume concludes with examples of larger-scale systemic approaches to supporting children's development during the transition to kindergarten, describing a coherent system of early childhood education that promotes long-term development. Featured topics include consistency in children's classroom experiences and implications for early childhood development, changes in school readiness in U.S. kindergarteners, effective transitions to kindergarten for low-income children, the transition into kindergarten for English language learners, and the role of
