successful and less successful action oriented curriculum initiatives Finally the book considers some of the important teacher education issues raised by this radically new approach to teaching and learning science and technology The book is intended primarily for teachers and student teachers of science technology and environmental education graduate students and researchers in education teacher educators curriculum developers and those responsible for educational policy The author is Emeritus Professor of Science Education at the Ontario Institute for Studies in Education University of Toronto Adjunct Professor of Science Education at the University of Auckland and Visiting Professor of Science Education at the University of Hong Kong His research interests include considerations in the history philosophy and sociology of science and their implications for science and technology education STSE education and the politicization of both students and teachers science curriculum history multicultural and antiracist education and teacher education via action research
