Time For Kids Personal Narrative:

Writing Through the Tween Years Bruce Morgan, Deb Odom, 2005 It's not easy being a tween. A lot of us are either in a tunnel or a bridge. A lot of us don't know who we are. Instead of following Barney's advice, we end up doing what popstars do. Kelley, age 10. No longer little children but not yet teenagers, tweens are beginning to see themselves as autonomous while still struggling to understand where they fit in. It can also be an awkward time for teachers who cherish the hilarious and poignant personalities of tween writers but feel pressured by a new emphasis on testing in the intermediate grades. Many teachers have virtually abandoned writers workshops in favor of formula writing and prompts even though these workshops may be essential for understanding the emerging competencies and personalities of eight to twelve year olds. Bruce Morgan and Deb Odom teach together at a school where formula writing and test preparation led to stagnant writing scores, student boredom, and teacher discouragement. They worked with their colleagues in grades 3-6 to make some dramatic changes in their collective writing instruction. These changes included a return to their roots as writing workshop teachers but with new twists. The teaching staff drew up new common standards for writing assessment and achievement. The revised writing programs also involved integrating insights from reading strategy instruction with a renewed emphasis on the basics of writers workshop: student choice, teacher modeling, revision, and using quality children's literature as mentor text. *Writing Through the Tween Years* documents how teachers can get back to the joys of teaching writing in a literature-rich, thoughtful environment. There may be no better way to understand and reach tween writers. *Teaching the Youngest Writers* Marcia Sheehan Freeman, 1998 Provides guidance in teaching writing at the K-2 level, discussing daily writing workshops, the writing process, content evaluation, and parent education. Includes lessons and activities. *Bully Busters* Arthur M. Horne, Christi L. Bartolomucci, Dawn Newman-Carlson, 2003 The *Bully Busters* approach is research-based and emphasizes both control and prevention. It helps teachers increase their awareness, knowledge base, and intervention skills to attack the root causes of bullying behavior and to deal with the problem confidently. The manual is organized into seven modules. Each module includes a teacher information component and a series of classroom activities. Parenting/Internet/Kids: Domesticating Technologies Fiona Joy Green, Jaqueline McLeod Rogers, 2022-07-07 *Parenting Internet Kids* with three key terms slashed together conveys the idea that the practice of parenting may extend both to the Internet and to our children to the extent that both require attention, care, and forms of regulation and in turn provide support and enjoyment. While the triadic title is somewhat playful, it also strikes a serious note and introduces layered possibilities: we are not simply raising children who have grown up in the internet age but also *Domesticating Technologies* by managing the computer relatively young in age too, having established itself in homes in the 1980s. Including perspectives from scholars and parents living in Australia, Canada, India, Japan, the UK, and the USA, the collection examines how the intimate presence of computer technology in our homes and on our bodies affects not only mothers and parenting but family life more broadly.
