Alexander Gillespie, 2011-10-07 This unique new work of reference traces the origins of the modern laws of warfare from the earliest times to the present day Relying on written records from as far back as 2400 BCE and using sources ranging from the Bible to Security Council Resolutions the author pieces together the history of a subject which is almost as old as civilisation itself The author shows that as long as humanity has been waging wars it has also been trying to find ways of legitimising different forms of combatants and ascribing rules to them protecting civilians who are either inadvertently or intentionally caught up between them and controlling the use of particular classes of weapons that may be used in times of conflict Thus it is that this work is divided into three substantial parts Volume 1 on the laws affecting combatants and captives Volume 2 on civilians and Volume 3 on the law of arms control This second book on civilians examines four different topics The first topic deals with the targetting of civilians in times of war This discussion is one which has been largely governed by the developments of technologies which have allowed projectiles to be discharged over ever greater areas and attempts to prevent their indiscriminate utilisation have struggled to keep pace The second topic concerns the destruction of the natural environment with particular regard to the utilisation of starvation as a method of warfare and unlike the first topic this one has rarely changed over thousands of years although contemporary practices are beginning to represent a clear break from tradition The third topic is concerned with the long standing problems of civilians under the occupation of opposing military forces where the practices of genocide collective punishments and or reprisals and rape have occurred The final topic in this volume is about the theft or destruction of the property of the enemy in terms of either pillage or the intentional devastation of the cultural property of the opposition As a work of reference this set of three books is unrivalled and will be of immense benefit to scholars and practitioners researching and advising on the laws of warfare It also tells a story which throws fascinating new light on the history of international law and on the history of warfare itself **The Real**

,Ali Demircioğlu,2023-03-01 The last one year proved itself to be a very tough year and it brought many new challenges for the international relations Among these new challenges the most striking one is probably the Russia s unleashing a war of aggression on Ukraine As Russia s invasion stepped up on the 24 February 2022 many Western experts and policymakers predicted that the Ukrainian armed forces wouldn t be able to defend Kyiv and that it would fall to the invaders before the month ended Nonetheless the government and people of Ukraine are still fighting and you can see evidence of this everywhere you walk in Kyiv thanks to the flag of free Ukraine flying from rooftops It is clear that we are entering a new era in international relations one that has revived the horrors and catastrophes of the past and paved the way for The Return of History regardless of the outcome of the conflict in Ukraine Now that a full year has passed since the beginning of the attack TPQ has devoted this issue to exploring the implications of the Russian invasion of Ukraine on many spheres ranging from energy security to agriculture At the same time we are raising the question of whether the current era deserves to be classified as the new Cold War If so who are the competing parties and in what ways is this new Cold War differs from the one that ended in 1991 with the United States and the liberal world emerging victorious To come up with sufficient and informative answers for these critical questions we assembled a large number of extremely valuable articles written by

eminent researchers policymakers journalists and young experts All around the world from the United States to Russia and from T rkiye to Sweden manuscripts came in from our contributors Hence it is with great pleasure that we provide you with this very qualified issue which investigates several facets of the emerging global order from an international perspective Professor Richard Sakwa investigates the causes of the resurgence of the Cold War and examines the differences between it with the original confrontation He thinks the Cold War mentality is once again ruling world relations These arguments suggest that the hope that the conclusion of the Cold War in 1989 would usher in a more universal and permanent peace has largely been disproved instead by 2014 the centennial of the beginning of World War I Europe was once again in the grips of bloody war The United States and the rest of the Political West as it had been reshaped by the Cold War remained on one side On the other hand he claims that a considerably diminished Russia has replaced the defunct Soviet Union and that this is happening alongside a China that is determined to regain its great power position Professor Li Bennich Bj rkman argues that Russia is using bombings attacks and cruelty to obliterate Ukraine s history As a result she sees the current conflict as a struggle to maintain the recollection of what a peaceful Ukraine looked like smelt like tasted like and felt like She contends that a split between Russia and Ukraine is inconceivable for Putin because of Ukraine s strategic importance to Russia Ukrainian President Leonid Kravchuk understood this as early as 1991 She says that he and other Ukrainian leaders sought to defend Ukrainian territory while assuring Moscow that amicable ties remained a possibility Russia she complains has never undergone a comparable transformation Professor Ziya ni who believes that we are in the midst of a Neo Cold War focuses more on the conflict between the West and the Rest He claims that the clash between democratic and authoritarian capitalism the defining conflict of the new era was exacerbated by Russia s invasion of Ukraine According to him the concerted effort of Western nations to end the conflict was evidence of the resurgence of the democratic club of Western governments and their allies G7 plus He also argues that a significant schism in opinion has developed between the West and the Rest as a direct result of the War He claims that the Russian War in Ukraine ushers in a new era in the post Western world one in which territorial conquests are accepted as the norm setting the path for more armed clashes in a globe already riven by war Professor Nicolai N Petro maintains that the healing of the Ukrainian people is often forgotten among the numerous conflicting narratives that drive the war in Ukraine He argues that this is because the West is ignoring the Other Ukraine whose dissatisfaction with the actions of the Ukrainian government since 2014 has stoked tensions According to him the West s reaction to Russia s incursion has focused on punishing Moscow but hasn t done anything to ease the tensions within Ukraine His work indicates that permanent societal harmony in Ukraine and peace in Europe can be achieved only via reconciliation inside Ukraine We encourage you to learn more about A Year Since the Return of History A New Cold War On behalf of Transatlantic Policy Quarterly I would like to express my gratitude to all the contributors who committed a significant amount of effort and work The TPQ team has had a great time putting together this special issue An important

Sold Out? US Foreign Policy, Iraq, the Kurds, and the Cold War Bryan R. Gibson, 2016-04-29 This book analyzes the ways in which US policy toward Iraq was dictated by America's broader Cold War strategy between 1958 and 1975 While most historians have focused on hot Cold War conflicts such as Cuba Vietnam and Afghanistan few have recognized Iraq's significance as a Cold War battleground This book argues that US decisions and actions were designed to deny the Soviet Union influence over Iraq and to create a strategic base in the oil rich Gulf region Using newly available primary sources and interviews this book reveals new details on America's decision making toward and actions against Iraq during the height of the Cold War and shows where Iraq fits into the broader historiography of the Cold War in the Middle East Further it raises important questions about widely held misconceptions of US Iraqi relations such as the CIA's alleged involvement in the 1963 Ba thist coup and the theory that the US sold out the Kurds in 1975

*Technological Innovation, Globalization and the Cold War* Wolfgang Mueller, Peter Svik, 2022-11-24 This volume focuses on the interconnections between the Cold War technological innovation and globalization Although the consequences of globalization have received ample attention in both academia and the public discourse only limited attention has so far been given to the factors that instigated various waves of this process This holds particularly true for the period following World War II during which a struggle between the two global blocs fanned not only technological innovations but also their transfer This volume is dedicated to examining the links between the Cold War and this phase in the history of globalization a phase that gradually made the world despite high levels of international tension more and more inter related More specifically it anchors a very contemporary phenomenon to its historical context and pinpoints how the varied and multi layered East West interactions helped to induce and foster the globalization processes Emphasizing technology and its cross bloc flows as well as several levels of actors including states private companies and individuals this volume reflects an important shift towards transnationalism which has occurred in the historiography in the recent years This book will be of interest to students of Cold War Studies science and technology studies and International Relations

**From Kites to Cold War** Tyler W Morton, 2019-10-15 From Kites to Cold War tells the story of the evolution of manned airborne reconnaissance Long a desire of military commanders the ability to see the terrain ahead and gain foreknowledge of enemy intent was realized when Chinese airmen mounted kites to surveil their surroundings Kite technology was slow to spread and by the late nineteenth century European nations had developed the balloon and airship to conduct this mission By 1918 it was obvious that the airplane had become the reconnaissance platform of the future Used successfully by many nations during the Great War aircraft technology and capability experienced its most rapid evolutionary period during World War II Entering the war with just basic airborne imagery capabilities by V E and V J days air power

pioneers greatly improved imagery collection and developed sophisticated airborne signals intelligence collection capabilities The United States and other nations put these capabilities to use as the Cold War immediately followed Flying near the periphery of and sometimes directly over the Soviet Union airborne reconnaissance provided the intelligence necessary to stay one step ahead of the Soviets throughout the Cold War

Hidden History of the Korean War I.F. Stone, 2023-05 At the height of the McCarthy era and the inception of the Cold War the great journalist I.F. Stone released The Hidden History of the Korean War a courageous work of investigative journalism that demolished the official story about America's so called forgotten war As the war spiraled to its conclusion Stone closely analyzed openly available U.S intelligence narratives on the war's official start and the actions of key players like John Foster Dulles General Douglas MacArthur and Chiang Kai shek The result of his investigations was a controversial book that raised questions about the origin of the war showed that the U.S government had manipulated the United Nations and gave evidence that the U.S military and South Korean oligarchy dragged out the war by sabotaging peace talks Stone made a strong case that there were those in the U.S government and military who saw instability in the region as in the U.S national interest
