and Federal Standards for Mobile-Source Emissions** National Research Council,Division on Earth and Life
Studies,Board on Environmental Studies and Toxicology,Committee on State Practices in Setting Mobile Source Emissions
Standards,2006-06-15 Emissions from mobile sources contribute significantly to air pollution in the United States Such
sources include cars and light and heavy duty trucks diesel powered cranes bulldozers and tractors and equipment such as
lawnmowers that run on small gasoline engines The role of state versus federal government in establishing mobile source
emissions standards is an important environmental management issue With this in mind Congress called on EPA to arrange
an independent study of the practices and procedures by which California develops separate emissions standards from the
federal government and other states choose to adopt the California standards The report provides an assessment of the
scientific and technical procedures used by states to develop or adopt different emissions standards and a comparison of
those policies and practices with those used by EPA It also considers the impacts of state emissions standards on various
factors including compliance costs and emissions The report concludes that despite the substantial progress in reducing
emissions from mobile sources nationwide more needs to be done to attain federal air quality standards in many parts of the
country Additionally California should continue its pioneering role in setting emissions standards for cars trucks and off road
equipment Introduction to Air in California David Carle,2006 Before you take another breath find out everything you
need to know about what s in your air David Carle has made California s most complicated environmental resource problem
accessible and interesting Mary D Nichols Director UCLA Institute of the Environment *California Air Resources Board's
Motor Vehicle Emissions Inventory* Whitney Renae Leeman,1998 *Transatlantic Regulatory Cooperation* David
Vogel,Johan F. M. Swinnen,2011-01-01 In this increasingly globalised regulatory environment there is a need to better
understand how the world s two most active trade blocks are cooperating especially with regard to pending complicated
regulations be it REACH or the proposed revision of US TSCA In this most timely book Vogel and Swinnen bring together an
outstanding group of scholars to help explain the delicate and important intricacies of present policy debates making the
volume essential reading for policy researchers regulators and consultants active in the area Ragnar Lofstedt King s College
London UK David Vogel and Johan Swinnen have assembled a first rate book on regulatory cooperation between the US and
EU The case studies provide detailed and nuanced analyses of policy areas from water to climate change and biotechnology
and the concluding chapters offer well judged and balanced assessments of the regulatory challenges for future transatlantic
relations Robert Falkner London School of Economics and Political Science UK *Transatlantic Regulatory Cooperation*
represents a cutting edge contribution to the study of economic regulation and in particular the prospects for cooperation

between the US and the EU as the world's dominant economic blocs. The authors among the leading scholars in their fields provide theoretically and empirically informed studies of transatlantic cooperation and conflict in areas such as the environment, climate change, food safety, and genetically modified foods, deriving provocative and compelling policy recommendations from each. The discussion of federalism and the opportunities and constraints it presents for international cooperation is superb. Mark A. Pollack, Temple University, US. This well-documented book analyzes the possibilities and constraints of regulatory cooperation between the EU and the US, particularly California, with a specific focus on environmental protection, food safety, and agriculture, biosafety, and biodiversity. *Transatlantic Regulatory Cooperation* features eleven original essays by leading academics of regulation on both sides of the Atlantic. They explore topics such as the impact of federalism on regulatory policies both within the US and Europe, the transatlantic dynamics of water policy, climate change, pesticide and chemical regulation, and biotechnology. A primary focus of this timely study is on the shifting roles of California and the EU as regulatory leaders and its impact on future regulatory cooperation across the Atlantic. This informative book will appeal to graduate and postgraduate students as well as academics and researchers in international relations, business law, and economics who are working on regulatory issues. The policy community, which focuses on regulation and transatlantic regulatory relations, will also find it an important resource.

In this timely book Sven Rudolph and Elena Aydos take an interdisciplinary approach that combines sustainability, economics, political economy, and legal concepts to answer two fundamental questions: How can carbon markets be designed to be effective, efficient, and just at the same time? And how can the political barriers to sustainable carbon markets be overcome? The authors advance existing theoretical frameworks and examine empirical data from various real-life emissions trading schemes, identifying strategies and policy windows for implementing truly sustainable ETS.

A Tale of Two Cities: A Comparison of Air Pollution Governance in the Los Angeles Area of the USA and the Beijing-Tianjin-Hebei Area of China Xi Wang, Richard Ottinger, 2023-12-11. The successful reduction of urban air pollution is among the notable achievements of modern environmental law and policy. This remarkable study focusing on two of the world's most prominent cases explores how people in the areas of Los Angeles and Beijing, Tianjin, Hebei, BTH established

governance processes to combat air pollution and how the major actors in each area worked to make their region a better place to live Employing the expertise of teams of knowledgeable environmental law experts from both China and the United States the authors identify and analyze similarities and differences in the respective legal and policy experiences as actors succeeded in greatly improving the air quality of their areas Underpinned by a model of environmental governance developed by the authors and presenting an abundance of first hand information from both areas the study finds that despite broad political and cultural differences in both regions three political relations in governance processes emerge as enablers of effective reduction of air pollution relation between regulators and the regulated communities relation between all the supervisory political entities such as legislatures etc and regulators and relation between civil society including news media and nongovernmental organizations and polluters Specific areas of regulation covered include transportation ports energy efficiency utilities oil refineries building efficiency renewable energy coal dependency and optimizing energy structure With its sound replicable model its solid findings and its enlightening conclusions this incomparable work will prove of immeasurable value to administrative authorities and counsel worldwide engaged in combating air pollution Moreover its creative methodology is a signal contribution to the comparative study of environmental law and policy **Eagle Mountain**
