Tales from the Marketplace Nigel F. Piercy, 2012-10-02 *Tales from the Marketplace* Stories of Revolution Reinvention and Renewal is a highly innovative approach to building an understanding of the realities of market led strategic change in companies. It provides an engaging honest and effective understanding of real market strategy in major organizations by focussing on the forces behind value driven strategy. Nigel Piercy provides new and incisive insights into strategy and marketing through business stories that are contemporary and provocative. These new stories depict how major organizations have experienced revolution in their traditional markets created by new types of competitors with new business models. The search for superior value is overtaking traditional brand and relationship strategies. The challenge to companies is reinvention and renewal and the alternative is obsolescence and decline. After all did the major banks really expect to be competing with supermarkets car companies Virgin and internet based companies to provide retail bank services. The book is based on the author's view that Business is exciting turbulent and unpredictable the stories we read and study should be too. From Dell Computers and easyJet to Amazon.com and Skoda Cars it is the most innovative companies that have most to teach us about reinvention and new business models. The inflexible analytical frameworks of the past no longer apply. Stories of reinvention and renewal show the creative strategies developed by companies to cope with threats and exploit opportunities around them. *Tales from the Marketplace* is essential timely and designed to be highly readable for managers. It also provides an innovative approach for undergraduate and MBA level teachers and students and for participants on executive programmes in marketing and strategic management.

A Successful Transformation? Petr Pavlínek, 2008-04-30 I started researching the dramatic changes in the automobile industry of Central and East European countries in the late 1990s. My interest grew out of my previous work on the post socialist transformation foreign direct investment and regional economic development. While researching the economic and regional development effects of foreign direct investment I was increasingly drawn to the automobile industry because of the speed and depth of its transformation through foreign direct investment and its potentially very significant economic and regional development effects. In addition to working on the Central and East European automobile industry as a whole I became interested in detailed case studies of enterprise restructuring as I wanted to understand its complex nature and the role of different actors in the restructuring of the automobile industry. In order to achieve this goal I visited dozens of automotive enterprises especially in the Czech Republic. Czechia to conduct in depth interviews with key informants. I have also interviewed key informants at ministries automotive associations and academia and collected various secondary data and information. This book is the outcome of this work. In this endeavor I have benefited from various support. The University Committee on Research and Creative Activity at the University of Nebraska at Omaha funded three field work sessions in Czechia to conduct interviews and research for this book.

Electric and Plug-in Hybrid Vehicle Networks Emanuele Crisostomi, Robert Shorten, Sonja Stüdli, Fabian Wirth, 2017-10-30 This book explores the

behavior of networks of electric and hybrid vehicles The topics that are covered include energy management issues for aggregates of plug in vehicles the design of sharing systems to support electro mobility context awareness in the operation of electric and hybrid vehicles and the role that this plays in a Smart City context and tools to test and design massively large scale networks of such vehicles The book also introduces new and interesting control problems that are becoming prevalent in the EV PHEV s context as well as identifying some open questions A particular focus of the book is on the opportunities afforded by networked actuation possibilities in electric and hybrid vehicles and the role that such actuation may play in air quality and emissions management
