and Italy i.e. fraud and manipulation of capital markets by belatedly providing shareholders with essential information relevant for the share value and potentially environmental crimes. It demonstrates how Dieselgate has sparked new debates in Germany, Italy, France and the UK about the need to introduce enterprise liability for organised crimes, lack of compliance and control structures and intentional violations of the law. Lastly, the book discusses how EU law has sought to respond to Dieselgate and thus investigates the controversial EU Regulation No 2016/646 introducing a temporary conformity factor of 2.1 equivalent to a 110% increase on the current limit to be applied for NOx in the new RDE testing cycle and the works of the EU committee of inquiry into Emissions Measurements in the Automotive Sector (EMIS).

Written by a master mechanic and bestselling author. *Green Crimes and Dirty Money* Toine Spapens, Rob White, Daan van Uhm, Wim Huisman, 2018-05-30 Environmental crimes are primarily driven by financial motives. The combined financial value of illicit trade in protected wildlife, illegal logging and waste trafficking is estimated to come directly after counterfeiting the narcotic drugs trade and illegal gambling. Logically, the proceeds of these crimes must also be laundered. Goods, however, are not the only money maker for environmental criminals. Corporations may also try to save costs by not complying with environmental regulations and thus commit crimes of omission rather than commission. From an enforcement and compliance perspective, focusing on the proceeds of crime may therefore be an effective strategy. This book brings together different perspectives on the financial aspects of environmental crime and harm from a green criminological viewpoint. It addresses the role of economic systems, the value of environmental performance for corporations, money laundering in the context of environmental crime, financial investigation and questions of regulation and penalties. Discussing these topics from the view of green criminology, sociology and governance, this book will be of great interest to all those concerned about the financial dimensions of crime and the environment. *Bailey's Industrial Oil and Fat Products*,

drawn from around the world and span a range of industries civil nuclear power coal oil and gas production hydropower energy metals and mining space exploration transport finance retail manufacturing and even the response of governments to wars famines and epidemics Together case studies give an insight into why people hesitate to report risks and even when they do why their superiors often prefer to ignore the news The book reviews existing research on the challenges of voice and silence in organizations This helps to explain more generally why people dread passing on bad news to others and why in the workplace they prefer to keep quiet about unpleasant facts or potential risks when they are talking to superiors and colleagues The discussion section of the book includes important examples of concealment within the Chinese state hierarchy as well as by leading epidemiologists and governments in the West during the novel coronavirus outbreak in Wuhan in 2019 2020 The full picture of the very early stage of the COVID 19 pandemic remains unclear and further research is obviously needed to better understand what motivated some municipal provincial and national officials in China as well as Western counterparts to obfuscate facts in their internal communications about many issues associated with the outbreak
