The Constellational Novel Louis Klee, 2025-08-05 A constellational novel is a novel that has an associative essayistic digressive and densely patterned prose form The Constellational Novel aims to shed light on the field of contemporary literature by offering a definitive theory of the constellational novel These novels are recognizable by the presence of a first person narrator committed to drawing affinities and making connections among disparate things Beginning with Marcel Proust Klee's argument focuses on novels published over roughly the last two decades between 2001 and 2020 by writers such as W G Sebald Lisa Robertson Teju Cole Jacqueline Rose and Olga Tokarczuk Strikingly it is often assumed that the attunement of their narrators to an unfolding web of potential interconnections holds an ethical promise of new ways of relating to oneself others and the world Klee considers this implication of ethics and associative form to be peculiar and in some important respects unprecedented in the history of the novel How is recognizing connections between things ethical exactly Could it not simply be the working of a resourceful or possibly even deranged intelligence one that obsessively sees patterns everywhere Why should the value of literature hinge on such an idiosyncratic process And what does finding affinities have to do with the more familiar categories of novelistic form like character and narrative Taking inspiration from the work of Walter Benjamin this book analyzes the distinctive ethics of affinity offered by these novels and thus seeks to clarify one of the most intriguing and consequential developments in the contemporary novel

The Literary World Evert Augustus Duykinck,Charles Fenno Hoffman,George Long Duykinck,1847 *The Philology of Life* Kevin McLaughlin,2023-01-17 The Philology of Life retraces the outlines of the philological project developed by Walter Benjamin in his early essays on Holderlin the Romantics and Goethe This philological program McLaughlin shows provides the methodological key to Benjamin s work as a whole According to Benjamin German literary history in the period roughly following the first World War was part of a wider crisis of historical experience a life crisis to which Lebensphilosophie philosophy of life had instructively but insufficiently responded Benjamin s literary critical struggle during these years consisted in developing a philology of literary historical experience and of life that is rooted in an encounter with a written image The fundamental importance of this

philological method in Benjamin's work seems not to have been recognized by his contemporary readers including Theodor Adorno who considered the approach to be lacking in dialectical rigor. This facet of Benjamin's work was also elided in the postwar publications of his writings both in German and English. In recent decades the publication of a wider range of Benjamin's writings has made it possible to retrace the outlines of a distinctive philological project that starts to develop in his early literary criticism and that extends into the late studies of Baudelaire and Paris. By bringing this innovative method to light, this study proposes the philology of life as the key to the critical program of one of the most influential intellectual figures in the humanities.

The Oxford History of the Novel in English Simon Gikandi, 2016-09-05. Why did the novel take such a long time to emerge in the colonial world? And what cultural work did it come to perform in societies where subjects were not free and modes of social organization diverged from the European cultural centers where the novel gained its form and audience? Answering these questions and more, Volume 11: *The Novel in Africa and the Caribbean since 1950* explores the institutions of cultural production that exerted influence in late colonialism, from missionary schools and metropolitan publishers to universities and small presses. How these structures provoke and respond to the literary trends and social peculiarities of Africa and the Caribbean impacts not only the writing and reading of novels in those regions but also has a transformative effect on the novel as a global phenomenon. Together, the volume's 32 contributing experts tell a story about the close relationship between the novel and the project of decolonization and explore the multiple ways in which novels enable readers to imagine communities beyond their own and thus made this form of literature a compelling catalyst for cultural transformation. The authors show that even as the novel grows in Africa and the Caribbean as a mark of the elites' mastery of European form, it becomes the essential instrument for critiquing colonialism and for articulating the new horizons of cultural nationalism. Within this historical context, the volume examines works by authors such as Chinua Achebe, Nadine Gordimer, George Lamming, Jamaica Kincaid, V. S. Naipaul, Zee Wicomb, J. M. Coetzee and many others.
