Identity in Science Fiction

Tom Cochrane,2025-09-18 In the first science fiction and philosophy anthology to focus on identity a set of exemplary stories raise deep questions about who and what we are Featuring classic authors and brand new work we are confronted with a fundamental metaphysical topic within every story Are we souls brains animals or patterns of information Are the Buddhists right to say that the self is an illusion Do we survive under conditions such as total amnesia or the destruction of the body Each story is accompanied by an introductory overview and narrative explaining the ideas and the principal philosophical arguments behind it Alongside deeper appreciation of stories by authors such as Roald Dahl John Varly J R Dawson and Ursula Le Guin we are seamlessly introduced to the philosophy of personal identity through memorable fiction The Barbie Murders depicts a society in which each member conforms to a strict template for their physical and mental characteristics Marley and Marley follows a middle aged woman who takes part in a government program to travel back in time to take care of her orphaned younger self Edward the Conqueror illustrates the concept of the soul as an essence of a person that persists while other things about them may change Thought provoking and highly entertaining this one of a kind anthology challenges traditional beliefs around how we see ourselves and allows us to understand what it means to be human

The Passions of the Soul in the Metamorphosis of Becoming Anna-Teresa Tymieniecka, 2013-03-09 Over the millennia philosophy has sought the ultimate understanding of the full human horizon of existence as well as of human destiny and the ultimate sense of it All The innumerable attempts to grasp the answers to these questions each taking its own approach and having its own preconceptions have engendered a range of different philosophical approaches one so broad that seemingly unbridgeable rifts impede possible cross fertilizing communication And yet the themes of all of them e.g. the immeasurable cosmos life the individual being bearing life the human person within his or her world and his or her longings to transcend that world the human mind its pragmatic cognitive tools creative speculative pursuits remain constants The logos they all share is one It is not that no vicarious sharing of intuitive glimpses by the proponents of the varied doctrines and methods in question occurs The history of philosophy is in fact marked by the juxtaposing of theories and approaches having different trajectories and by the mixing of insights the crossing of borders etc However what is greatly needed is in depth comparison of the various doctrines and a reflection on the contrasting opposing clashing perspectives that seeks foundations for all of them in the human creative condition in that microcosm that extends its tentacles toward the two great infinities the external infinity of the cosmos and the internal infinity of transcending destiny
