major focus in urban history little has been written on censorship in the very city that due to shifting legalities the urban crisis and racial tensions profoundly shaped media suppression in the United States By examining censorship in film and literature Indecent Detroit recounts the evolution of media control from the end of WWII through the 1970s when the US saw a major change in the legal mechanisms used to censor media due to court rulings that curtailed censorship laws Ben Strassfeld reveals how Detroit altered its censorial tactics and rhetoric from an obscenity based system of censorship centered in the Detroit Police Department to a regulatory model based in zoning law that was then expanded nationwide This shift was connected to broader social and political trends including the sexual revolution that led the public to increasingly turn against censorship A must read for film and media scholars Indecent Detroit highlights how one Midwest city s ordinance was imitated across the country after it was upheld by the US Supreme Court making this more than a local curiosity but also an influential model for the cultural political and moral control of urban space through media regulation

Elites and Urban Development Scott Cummings, 1988-04-07 Written in a non technical narrative style this book is an invaluable resource for anyone concerned with current trends in urban development During the Reagan era responsibility for urban planning and development was transferred from government to private business This private sector hegemony over urban development differs markedly from the liberal policy initiatives of the 1960s and 1970s Through a series of case studies this book examines these shifting trends and shows that private sector efforts to revitalize America's central cities have not been uniformly successful The contributors who are among America's leading social scientists utilize neo Marxist urban theory to explain the conditions under which private initiative enhances or erodes downtown redevelopment

Managing Big Business Richard S. Tedlow, Richard R. John, 1986 *Knowledge Towns* David J. Staley, Dominic D. J.

Endicott,2023-03-21 The remote work revolution presents a unique opportunity for higher education institutions to reinvent themselves and become talent magnets In Knowledge Towns David J Staley and Dominic D J Endicott argue that the location of a college or university is a necessary piece of any region s effort to attract remote knowledge workers and accelerate economic development and creative placemaking Just as every town expects a church bank branch post office and coffeehouse Staley and Endicott write we will see a decentralized network of institutions of higher education flourish acting as cornerstones for the post pandemic rebuilding of our society and economy In calling for a college in any town they are not simply proposing placing a traditional college within a town or city but envisioning instead a particular kind of higher education institution called a knowledge enterprise In addition to providing the services of a traditional college a knowledge enterprise acts as a talent magnet attracting workers looking to move to cheaper and more attractive destinations With the post COVID 19 shift to more remote work and millions of people moving to more affordable and livable cities a place that wants to attract talent will require a thriving academic environment This represents a new opportunity for town and gown to create collaborative communities The pandemic has accelerated existing trends that put at risk the viability of many colleges and universities as well as that of many towns and cities The talent magnet strategy outlined in this book offers colleges and towns a plan of action for regeneration
