Worthington, 2000-05-15 Another information packed time saving tool for teachers from the authors of *Novels and Plays* this book contains 30 teaching guides for some of the best literature commonly taught in grades 6-12. With initiating activities, chapter by chapter discussion questions, writing assignments and interdisciplinary extensions, these are complete lesson plans. Multimedia Learning Stations Jen Spisak, 2015-09-28 Learn how to use rotating multimedia learning stations employing databases, websites, education apps, videos, audio podcasts, online games, books, and more to build a strong collaborative library program that helps you strengthen student understanding of the research process. Libraries across America are losing funding and suffering from cuts in positions and programs. The process presented here will help you increase library use and prove that school libraries and librarians are a necessity. Written for middle and secondary school librarians, the book provides a guide to using standards-based and content-focused learning stations in the library to facilitate instruction and strengthen students' research skills. You'll learn what multimedia stations are, why they should be used, and how to use them to enhance and extend direct instruction. Plus, the book breaks down the steps for building sets of stations and shows you how to organize and implement them for maximum impact. In addition to describing the hows, the book provides sound arguments for why multimedia learning stations work. The method ensures that students gain continued practice with resources and build the skills and dispositions you want them to have. It also increases the amount of collaboration you'll have with teachers and enhances your interactions with and influence on your students. Teacher and student testimonials are interspersed throughout the book, and appendices offer you specific examples from which to draw.

sometimes challenged by scholars who have claimed that the Midwest is not an ideal locale for studying communication across cultures and among people from varying cultural backgrounds. However, over the years, scholars have established that intercultural communication is an important area of scholarship in the Midwest and beyond, and that the region offers plenty of opportunities for studying the intersections of cultural perspectives in communication, ranging from racial and ethnic discrimination to the adaptation process of international students and from immigrant experiences to issues in queer cultures. Because IC research does not exist in isolation and it is always connected to larger frameworks or theoretical approaches within communication studies, the contributors in this book address how IC scholarship informs other areas of research and how IC scholars use the concepts and theoretical lenses of IC research to examine issues outside of IC. Although the focus is mainly on IC scholarship within the CSCA region, the scope of the book extends beyond this regional boundary as well. This book was originally published as a special issue of *Communication Studies*. *Global Citizenship Education* Abdeljalil Akkari, Kathrine Maleq, 2020-08-18. This open access book takes a critical and international perspective to the mainstreaming of the Global Citizenship Concept and analyses the key issues regarding global citizenship education across the world. In that respect, it addresses a pressing need to provide further conceptual input and to open global citizenship agendas to diversity and indigeneity. Social and political changes brought by globalisation, migration, and technological advances of the 21st century have generated a rise in the popularity of the utopian and philosophical idea of global citizenship. In response to the challenges of today's globalised and interconnected world, such as inequality, human rights violations, and poverty, global citizenship education has been invoked as a means of preparing youth for an inclusive and sustainable world. In recent years, the development of global citizenship education and the building of students' global citizenship competencies have become a focal point in global agendas for education, international educational assessments, and international organisations. However, the concept of global citizenship education still remains highly contested and subject to multiple interpretations, and its operationalisation in national educational policies proves to be challenging. This volume aims to contribute to the debate, question the relevancy of global citizenship education's policy objectives, and to enhance understanding of local perspectives, ideologies, conceptions, and issues related to citizenship education on a local, national, and global level. To this end, the book provides a comprehensive and geographically based overview of the challenges citizenship education faces in a rapidly changing global world through the lens of diversity and inclusiveness. *Understanding Cultural Transmission in Anthropology* Roy Ellen, Stephen J. Lycett, Sarah E. Johns, 2013-08-01. The concept of cultural transmission is central to much contemporary anthropological theory, since successful human reproduction through social systems is essential for effective survival and for enhancing the adaptiveness of individual humans and local populations. Yet what is understood by the phrase and how it might best be studied is highly contested. This book brings together contributions that reflect the current diversity of approaches from the fields of biology, primatology, palaeoanthropology, psychology, social anthropology, ethnobiology, and

archaeology to examine social and cultural transmission from a range of perspectives and at different scales of generalization The comprehensive introduction explores some of the problems and connections Overall the book provides a timely synthesis of current accounts of cultural transmission in relation to cognitive process practical action and local socio ecological context while linking these with explanations of longer term evolutionary trajectories *Distance Learning* Michael
