Offering a model of reflexivity and learning in the face of public dispute, it explores phenomena such as problem solving, democratization, public learning and uncertainty to address certain tensions in governance theory and practice. Through a range of well-sourced case studies, this book demonstrates how institutions can manage difficult situations by not only resolving the conflict but addressing the underlying problem. It uses both theoretical and practical approaches to observe the micro-foundations of political behavior and its institutional underpinnings and will be a valuable resource for public administration researchers, practitioners and graduate students seeking empirical studies of learning processes in the public sphere.
