Sample Book Insights

- 1 The word meaning is used in two different ways The first is to imply intention which is the heart of the philosophical worldview of organized religions The second is to imply the accidents of history not the intentions of a designer are the source of meaning
- 2 The second more inclusive meaning of human existence is the capacity to imagine possible futures plan and choose among them and use this ability wisely The question of greatest relevance is how and why we are the way we are and the meaning of our many competing visions of the future
- 3 The second broader meaning of our species is that humanity arose entirely on its own through an accumulated series of events during evolution We are not predestined to reach any goal and we are not answerable to any power but our own
- 4 The human condition is a product of history and the key to understanding it lies in the circumstance and process that created our species Eusociality is the most complex societies have arisen through and it has only arisen among insects marine crustaceans and subterranean rodents

The Varieties of Nonreligious Experience Jerome P. Baggett, 2019-07-09 A fascinating exploration of the breadth of social emotional and spiritual experiences of atheists in America Self identified atheists make up roughly 5 percent of the American religious landscape comprising a larger population than Jehovah s Witnesses Orthodox Christians Muslims Buddhists and Hindus combined In spite of their relatively significant presence in society atheists are one of the most stigmatized groups in the United States frequently portrayed as immoral unhappy or even outright angry Yet we know very little about what their lives are actually like as they live among their largely religious and sometimes hostile fellow citizens In this book Jerome P Baggett listens to what atheists have to say about their own lives and viewpoints Drawing on questionnaires and interviews with more than five hundred American atheists scattered across the country *The Varieties of Nonreligious Experience* uncovers what they think about morality what gives meaning to their lives how they feel about religious people and what they think and know about religion itself Though the wider public routinely understands atheists in negative terms as people who do not believe in God Baggett pushes readers to view them in a different light Rather than simply rejecting God and religion atheists actually embrace something much more substantive lives marked by greater integrity open mindedness and progress Beyond just talking about or to American atheists the time is overdue to let them speak for themselves This book is a must read for anyone interested in joining the conversation

On the (Divine) Origin of Our Species Darrel R. Falk, 2023-11-30 The Bible s opening chapter includes these words So God created humans in his image in the image of God he created them male and female he created them We are created beings with a unique status in creation Nothing is more fundamental to Christian faith Yet biologists present extensive data and provide a picture of how our species came to be but there is no Creator in the intricate details of the painting they provide If the scientific evidence for the evolution picture is reasonable and in general it is and if humans were indeed created from a common ancestor of the great apes then what can be said about the Artist who Christians believe was at work Vague answers are not satisfactory anymore not in this scientific age Recent mainstream data from paleoanthropology and genetics suggest that the basis of our species success was not that they were superior fighters Rather the reason our ancestors thrived was likely their ability to function cooperatively in groups to respect each other and to get along This reframes the question about the nature of the hovering Spirit s activity in bringing our species into being And that is the subject of this book

Intersections of Religion and Astronomy Chris Corbally, Darryl Dinell, Aaron Ricker, 2020-11-01 This volume examines the way in which cultural ideas about the heavens shape religious ideas and are

DeJonge, Clifford J. Green, 2018-09-15 Prompted by the 2017 commemoration of the 500th anniversary of the Protestant Reformation this book examines the legacy of Martin Luther in the life work and reception of Dietrich Bonhoeffer the most widely read modern Lutheran theologian Framing the commemoration of the Reformation in conversation with Bonhoeffer s legacy places much more than Bonhoeffer s connection to Luther at stake Given the fraught relationship of the Lutheran Bonhoeffer with the German Protestant Church under National Socialism the question inevitably arises What happened to Luther s church in Germany This in turn prompts the question How did the Protestant tradition play out in public life in other nations And these historical issues in turn encourage reflection on a question that exercised both Luther and Bonhoeffer What will be the shape of the church in the future In these pages an international group of scholars and practitioners from both church and state pursues these questions

Landpower in the Long War Jason W. Warren, 2019-06-14 War and landpower s role in the twenty first century is not just about military organizations tactics operations and technology it is also about strategy policy and social and political contexts After fourteen years of war in the Middle East with dubious results a diminished national reputation and a continuing drawdown of troops with perhaps a future force increase proposed by the Trump administration the role of landpower in US grand strategy will continue to evolve with changing geopolitical situations Landpower in the Long War Projecting Force After 9 11 edited by Jason W Warren is the first holistic academic analysis of American strategic landpower Divided into thematic sections this study presents a comprehensive approach to a critical aspect of US foreign policy as the threat or ability to use force underpins diplomacy The text begins with more traditional issues such as strategy and civilian military relations and works its way to more contemporary topics such as how socio cultural considerations effect the landpower force It also includes a synopsis of the suppressed Iraq report from one of the now retired leaders of that effort The contributors made up of an interdisciplinary team of political scientists historians and military practitioners demonstrate that the conceptualization of landpower must move beyond the limited operational definition offered by Army doctrine in order to encompass social changes trauma the rule of law acquisition of needed equipment civil military relationships and

bureaucratic decision making and argue that landpower should be a useful concept for warfighters and government agencies

Ethics in a Time of Barbarism Carl P. Ellerman, 2025-08-19

During a time of widespread intraspecific aggression and barbaric captivity throughout the planet, this study of the ethics of survival asks the burning question: At the extremes of experience, when captives are struggling to survive, is there a line at which the moral judgment of survival behavior ceases? Stated differently: Are there times in the lives of humans when the valiant attempt to maintain moral scruples clashes with the way the world is? Moments when moral pretension, moral aspiration, and the expectation of moral agency are absurd? Putting the burning question under strain, Carl P. Ellerman offers testimony from the confessional publications of survivors who were subjected to life-threatening barbaric experiences. He also critically scrutinizes the competing ethical perspectives of Hume, Kant, Nietzsche, and the U.S. Department of Defense Military Code of Conduct to show how the ethics of survival has been handled philosophically and militarily. Empirical evidence from Evolutionary Biology, Primatology, and the Neurosciences is interwoven to advance a biological realism in the ethics of survival. Readers are also invited to undertake an honest self-examination using active imagination to answer unsparing questions as if each reader were wearing the shoes of a captive who abjures the fictions of an ideal self.
