The Memory of the World Ted Toadvine, 2024-05-14 Advancing a phenomenological approach to deep time Our imagination today is dominated by the end of the world from sci fi and climate fiction to actual predictions of biodiversity collapse climate disruption and the emergence of the Anthropocene This obsession with the world's precarity The Memory of the World contends relies on a flawed understanding of time that neglects the past and present with the goal of managing the future Not only does this mislead sustainability efforts it diminishes our encounters with the world and with human and nonhuman others Here Ted Toadvine takes a phenomenological approach to deep time to show how our apocalyptic imagination forgets the sublime and uncanny dimensions of the geological past and far future Guided by original readings of Maurice Merleau Ponty Emmanuel Levinas Jacques Derrida Jean Luc Nancy and others he suggests that reconciling our embodied lives with the memory of the earth transforms our relationship with materiality other forms of life and the unprecedented future Integrating insights from phenomenology deconstruction critical animal studies and new materialism The Memory of the World argues for a new philosophy of time that takes seriously the multiple pleated and entangled temporal events spanning cosmic geological evolutionary and human durations

**The Memory We Could Be** Daniel Macmillen Voskoboynik, 2018-09-25 Voskoboynik's book offers an exhilarating introduction to our ecological crisis what caused it and how we can imagine a better future Jason Hickel author of Less Is More The Memory We Could Be moves beyond the sterile technical language around climate change and ecology to humanize the abstraction of global warming and bring different voices into the conversation Drawing on sources from anthropology to hydrology botany to economics agronomy to astrobiology medicine to oceanography physics to history the author weaves a lyrical and powerful story of our relationship with nature The book has three parts Past addresses memory Our inability to comprehend our staggering present partly lies in our ignorance of our staggering past We peer into the black box of history to understand how we got here We go on a journey across the roots of our ecological crisis from the Roman Empire to the forests of Burma from Congolese rubber plantations to Colombian oil fields Present illustrates how climate change is shaping our world today explores how it relates to poverties and inequalities and equips readers with a set of intuitive instruments to understand climate impacts Future looks at alternatives and strives to illustrate in human terms the world we could lose and the world we can win It asks what we can do and develops a transformative vision of a more ecological and equitable economy The Memory We Could Be is vital reading for all of humanity A gripping review of where we've been where we are and where we may be headed Michael E Mann author of The New Climate War

The Soul and Secrets of Its Structure Larisa Seklitova, Ludmila Strelnikova, 2011-04-04 Since ancient times people have known about existence of the soul Every present religion on the Earth acknowledges that the man has it and all religions confirm that the soul is immortal and its loss is equal to death People offer prayers about salvation of their souls as the greatest value Many religions accept the reincarnation

theory i.e incarnating of the soul when the soul leaves human body after death and moves to newly born human body to proceed its development Thus what is the soul and what's the structure Our Heavenly Teachers have decided that it is time to give the humanity of third millennium new knowledge about the soul as people of sixth race who will live on the Earth in this period of time will be able to accept and understand these revealed truths This book is devoted to this topic New knowledge about the soul is shown up with care not to shock by the avalanche of new concepts For the first time they revealed that the soul is not only the eddy of invisible spirit but it has like the human body its own structure The first chapter of the book is about the structure of the soul Creation of Soul Jesus Christ says in the Bible In my Father's house there are many rooms This means there are many inhabited worlds in the Cosmos Souls for these worlds are created by God himself and his aides special Hierarchical Systems It takes 9 cosmic years to create one soul One cosmic year is approximately equal to 1 billion earthly years because time of God and time on the Earth flies differently God creates the soul and makes it spiritual The only God governs the Great Secret of vivification Without vivification there cannot be life as well When we asked God What is the soul He answered The soul is the integral part of the Absolute Many souls are sort of its interior filling They are its main Units like cells in your body All souls piece out the huge nature of the Absolute and God Structure of Soul The Soul is the complex energetical construction It is a volumetric favose structure matrix where one volume enters another and all are merged Cells of the matrix are completely digits which carry out energy Total volume of the soul is called configuration Types of soul configurations vary greatly The self construction principle is laid in the matrix Every soul while developing builds its configuration basing on energetical volumes which fill up cells of the matrix Qualitative and quantitative composition is different within all matrices That is the reason why there are no two absolutely similar souls The matrix is of great importance for every individual because a personality is not personality without it Individual ceases existing without the matrix as an inspired creation The soul is triune It consists of 3 principles plus minus and managerial When a soul has just been created all these three principles are equal and every part occupies  $\frac{1}{3}$  of total matrix volume In the course of development the balance between its parts constantly changes although if the managerial part reaches half the volume it maintains this balance This is a program of soul construction Soul Development Development and improvement of soul in everyday life consist in acquisition of life experience new knowledge evolving feelings and intellect but on energetical plane it is enlargement of own energetical potential The sense of life and any existence in any world is development of soul There are only two ways of soul development for the man plus direction to God and minus one to Devil Ways of virtue creativity development through medicine and additionally way of computation and programming connected with creativity lead to God Ways of evil degradation automatism and programming without creativity principle lead to Devil Development of soul in any world is based on a program Program of development is drawn up per one incarnation in the material body It is saved on one of hum
