The #1 New York Times Bestseller John Bear,1992 Lists hundreds of books that have made the famous list and offers facts about the publishing industry authors and the list itself **Clerical Celibacy** William E. Phipps,2004-09-10 The recent sex abuse scandals in the Catholic Church raised new questions about the abilities of a celibate priesthood to deal realistically with matters of sexuality Critics and journalists who have examined these scandals have called for an end to mandatory celibacy for priests In this overview Phipps points out that mandatory celibacy is relatively new fangled having appeared during the last half of the church s existence The innovation was imposed in the feudal and crusading era a dark period for the Church In order to provide this survey Phipps probes ancient religious texts and church history and uses studies that provide factual assessments of the general individual and cultural consequences of celibacy He avoids anecdotal evidence about celibacy and offers a balanced exploration by allowing celibate advocates and church representatives to speak in their own voices about these matters **BOOK JACKET** Title Summary field provided by Blackwell North America Inc All Rights Reserved **Creatures of Cain** Erika Lorraine Milam,2018-12-11 How Cold War America came to attribute human evolutionary success to our species unique capacity for murder After World War II the question of how to define a universal human nature took on new urgency Creatures of Cain charts the rise and precipitous fall in Cold War America of a theory that attributed man s evolutionary success to his unique capacity for murder Drawing on a wealth of archival materials and in depth interviews Erika Lorraine Milam reveals how the scientists who advanced this killer ape theory capitalized on an expanding postwar market in intellectual paperbacks and widespread faith in the power of science to solve humanity s problems even to answer the most fundamental questions of human identity The killer ape theory spread quickly from colloquial science publications to late night television classrooms political debates and Hollywood films Behind the scenes however scientists were sharply divided their disagreements centering squarely on questions of race and gender Then in the 1970s the theory unraveled altogether when primatologists discovered that chimpanzees also kill members of their own species While the discovery brought an end to definitions of human exceptionalism delineated by violence Milam shows how some evolutionists began to argue for a shared chimpanzee human history of aggression even as other scientists discredited such theories as sloppy popularizations A wide ranging account of a compelling episode in American science Creatures of Cain argues that the legacy of the killer ape persists today in the conviction that science can resolve the essential dilemmas of human nature **Outsider Scientists** Oren Harman,Michael R. Dietrich,2013-12-11 Outsider Scientists describes the transformative role played by outsiders in the growth of the modern life sciences Biology which occupies a special place between the exact and human sciences has historically attracted many thinkers whose primary training was in other fields mathematics physics chemistry linguistics philosophy history anthropology engineering and even literature These outsiders brought with them ideas and tools that were foreign to biology but which when applied to

biological problems helped to bring about dramatic and often surprising breakthroughs This volume brings together eighteen thought provoking biographical essays of some of the most remarkable outsiders of the modern era each written by an authority in the respective field From Noam Chomsky using linguistics to answer questions about brain architecture to Erwin Schrödinger contemplating DNA as a physicist would to Drew Endy tinkering with Biobricks to create new forms of synthetic life the outsiders featured here make clear just how much there is to gain from disrespecting conventional boundaries Innovation it turns out often relies on importing new ideas from other fields Without its outsiders modern biology would hardly be recognizable

Time Maps Eviatar Zerubavel, 2020-03-04 The pioneering sociologist and author of *The Seven Day Circle* continues his analysis of time with this fascinating look at history as social construct Who were the first people to inhabit North America Does the West Bank belong to the Arabs or the Jews Why are racists so obsessed with origins Is a seventh cousin still a cousin Why do some societies name their children after dead ancestors As Eviatar Zerubavel demonstrates in *Time Maps* we cannot answer burning questions such as these without a deeper understanding of how we envision the past In a pioneering attempt to map the structure of collective memory Zerubavel considers the cognitive patterns we use to organize the past and the social grammar of conflicting interpretations of history Drawing on fascinating examples that range from Hiroshima to the Holocaust and from ancient Egypt to the former Yugoslavia Zerubavel shows how we construct historical origins how we tie discontinuous events together into stories how we link families and entire nations through genealogies and how we separate distinct historical periods from one another through watersheds such as the invention of fire or the fall of the Berlin Wall *Time Maps* extends beyond all of the old clichés about linear circular and spiral patterns of historical process and provides us with models of the actual legends used to map history brilliant and elegant Hayden White University of California Santa Cruz

Sexual Paradox: Complementarity, Reproductive Conflict and Human Emergence Christine Fielder, Chris King, 2006 Unlocks the keys to the paradox of how sexual selection fertilized the explosion of culture and the resulting fallout in sexual dominion of man over woman and nature How sexuality generates the universe through symmetry broken complementarity The implicit conflict of interests of sexual intrigue in the prisoners dilemma and its ecstatic resolution in the cosmology of love Sexual dominance as a koan for planetary crises 560 pages containing 270 illustrations

Groovy Science David Kaiser, W. Patrick McCray, 2016-05-31 Did the Woodstock generation reject science or re create it An enthralling study of a unique period in scientific history New Scientist Our general image of the youth of the late 1960s and early 1970s is one of hostility to things like missiles and mainframes and plastics and an enthusiasm for alternative spirituality and getting back to nature But this enlightening collection reveals that the stereotype is overly simplistic In fact there were diverse ways in which the era's countercultures expressed enthusiasm for and involved themselves in science of a certain type Boomers and hippies sought a science that was both small scale and big picture as exemplified by the annual workshops on quantum physics at the Esalen Institute in

Big Sur or Timothy Leary's championing of space exploration as the ultimate high Groovy Science explores the experimentation and eclecticism that marked countercultural science and technology during one of the most colorful periods of American history. Demonstrate's that people and groups strongly ensconced in the counterculture also embraced science albeit in untraditional and creative ways. Science Each essay is a case history on how the hippies repurposed science and made it cool. For the academic historian Groovy Science establishes the deep mark on American culture made by the countercultural innovators. For the non historian the book reads as if it were infected by the hippies' democratic intent: no jargon, few convoluted sentences, clear arguments and a sense of delight. Nature In the late 1960s and 1970s the mind expanding modus operandi of the counterculture spread into the realm of science and sh t got wonderfully weird. Neurophysiologist John Lilly tried to talk with dolphins. Physicist Peter Phillips launched a parapsychology lab at Washington University. Princeton physicist Gerard O'Neill became an evangelist for space colonies. Groovy Science is a new book of essays about this heady time. Boing Boing

The Obsessive-Compulsive Disorder Robert Collie, Harold G Koenig, 2014-01-21 Gain scientific and theological insight into OCD. The Obsessive Compulsive Disorder: Pastoral Care for the Road to Change delivers a provocative and stimulating discussion that is meant to inspire new areas of inquiry on this subject. As an OCD sufferer, pastoral counselor, mental health student or professional, you will reach a new understanding of a complex condition that can destroy the day to day lives of its victims. The Obsessive Compulsive Disorder explores the connection between religion and OCD from many different perspectives. You will explore case studies of OCD with religious connections through interviews, diagnosed symptoms and discussion of the history of religious figures who suffered with OCD. The book also provides a reference list of organizations that focus on OCD as well as Web sites and Internet addresses devoted to assisting caretakers and helping sufferers. The Obsessive Compulsive Disorder will increase your knowledge of the evolution of humans and animals in relation to personality development and the obsessive compulsive disorder, church leaders with the obsessive compulsive disorder, brain development and biology and their links to the obsessive compulsive disorder, quality of life issues for sufferers, pastors and caregivers, group therapy for OCD sufferers including personal stories of OCD in connection with faith and religion, neurobiological perspectives on theological issues. The Obsessive Compulsive Disorder brings you insightful new research into this complex mental illness and will assist you in understanding and helping people who suffer from OCD.

Shakespeare and Violence R. A. Foakes, 2003 Shakespeare and Violence first published in 2002 connects to anxieties about the problem of violence and shows how similar concerns are central in Shakespeare's plays. At first Shakespeare exploited spectacular violence for its entertainment value but his later plays probe more deeply into the human propensity for gratuitous violence especially in relation to kingship, government and war. In these plays and in his major tragedies he also explores the construction of masculinity in relation to power over others, to the value of heroism and to self control. Shakespeare's last plays present a world in which human

violence appears analogous to violence in the natural world and both kinds of violence are shown as aspects of a world subject to chance and accident This book examines the development of Shakespeare's representations of violence and explains their importance in shaping his career as a dramatist Eugenics and the Nature-Nurture Debate in the Twentieth Century A. Gillette, 2007-10-29 Gillette shows that the sciences of sociobiology and evolutionary psychology were undergoing rapid development in the early Twentieth century However many of the early researchers in these sciences were also eugenicists With the rise of behaviourism and the reaction against eugenics in the 1930s any scientific claims that behaviour might be influenced by heredity were suppressed for ideological reasons **The Publishers Weekly**, 1968 Peace & Conflict Research Juergen Dedring, 1976-09 Banned Books Week Robert P. Doyle, 1993 **Family Matters** Hilde Løvdal Stephens, 2019-10-15 The first full length study of a pivotal figure in American evangelical faith James Dobson child psychologist author radio personality and founder of the Christian conservative organization Focus on the Family published his first book Dare to Discipline in 1970 and quickly became the go to family expert for evangelical parents across the United States as American evangelicalism rose as a major political force The family expert became a leading voice in the Reagan Revolution and played a role in making American evangelicals even more firmly associated with the Republican Party Dobson's principle beliefs are that the family is the center of Christian America and that the traditional family must be defended from perceived threats such as gay rights feminism abortion and the secularization of public schools Dobson and Focus on the Family dominated Christian media through print radio and online venues and their message reached millions of American evangelical households shaping the cultural sensibilities and political attitudes of evangelical families throughout the culture wars from the 1980s into the 2000s Family Matters James Dobson and Focus on the Family's Crusade for the Christian Home by Hilde Løvdal Stephens is an insightful history and analysis of James Dobson's rise to fame effect on American evangelical culture and subsequent descent from relevance Extensively researched Løvdal Stephens scoured through Dobson's books articles and other materials published by Focus on the Family in order to explore how evangelicals defined and defended the traditional family as an ideal and as a symbol in an ever changing world By contextualizing the history of Dobson's reign Løvdal Stephens's discerning analysis fills an important gap in our understandings of the politics and culture of late twentieth century conservative Christianity in the United States She explores complex topics ranging from Dobson's celebration of what he believes are timeless biblical values such as maintaining strict and defined gender roles to the ways Dobson and Focus on the Family balanced their basic ideals with real everyday lives of average American evangelical families facing the realities of divorce working mothers and other perceived threats to the traditional family **National Library of Medicine Current Catalog** National Library of Medicine (U.S.), 1965 **Human Prehistory in Fiction** Charles De Paolo, 2015-09-11 What was the world like for people thousands of years ago How can we know Through fiction This is a work of literary criticism and more It begins with a discussion of the problem of authenticity and then considers twelve pieces of fiction that

depict human prehistory H G Wells The Island of Doctor Moreau Pierre Boulle s The Planet of the Apes Jules Verne s The Village in the Treetops Edgar Rice Burroughs The Land That Time Forgot the struggle for legitimacy in Wells The Grisly Folk the Tasmanian analogue in Lester Del Rey s The Day Is Done William Golding s The Inheritors the promise of humanity in Arthur C Clarke s 2001 A Space Odyssey the theme of a god among the heathen in Wells The Lord of the Dynamos and other works Jean Auel s The Clan of the Cave Bear J H Rosny Aine s Quest for Fire and Wells The Time Machine An Invention A final chapter considers the paleoanthropologist as literary critic *Current Biography Yearbook* ,1975 **Psychiatry and Ethics** Maurice Levine,1972 This book was written for the nonprofessional as well as the professional It embodies part of Maurice Levine s contribution to disciplines other than his own many new and controversial formulations and a number of fascinating case histories This volume also includes such important papers by Dr Levine as the last memo he sent to his staff dictated a month before he died in which he tried to make even his own death a valuable instructive experience for his students
