Neumann, 2016-07-27 Drawing on a tripartite taxonomy first suggested by the so called English School of International Relations of a Hobbesian tradition of power politics a Grotian tradition of concern with the rules that govern relations between states and a Kantian tradition of thinking which transcends the existence of the states system this book discusses the thinking of central political theorists about the modern states system Thinkers covered are Hobbes Grotius Kant Vitoria Rousseau Smith Burke Hegel Gentz and Vattel Kant, Science, and Human Nature Robert Hanna, 2006-10-19 Robert Hanna argues for the importance of Kant's theories of the epistemological metaphysical and practical foundations of the exact sciences relegated to the dustbin of the history of philosophy for most of the 20th century Hanna's earlier book *Kant and the Foundations of Analytic Philosophy* OUP 2001 explores basic conceptual and historical connections between Immanuel Kant's 18th century Critical Philosophy and the tradition of mainstream analytic philosophy from Frege to Quine The central topics of the analytic tradition in its early and middle periods were meaning and necessity But the central theme of mainstream analytic philosophy after 1950 is scientific naturalism which holds to use Wilfrid Sellars's apt phrase that science is the measure of all things This type of naturalism is explicitly reductive Kant *Science and Human Nature* has two aims one negative and one positive Its negative aim is to develop a Kantian critique of scientific naturalism

But its positive and more fundamental aim is to work out the elements of a humane realistic and nonreductive Kantian account of the foundations of the exact sciences According to this account the essential properties of the natural world are directly knowable through human sense perception empirical realism and practical reason is both explanatorily and ontologically prior to theoretical reason the primacy of the practical **Religion 21st Century** M. The Routledge Companion to Nineteenth Century Philosophy Dean Moyar,2010-04-05 The nineteenth century is a period of stunning philosophical originality characterised by radical engagement with the emerging human sciences Often overshadowed by twentieth century philosophy which sought to reject some of its central tenets the philosophers of the nineteenth century have re emerged as profoundly important figures The Routledge Companion to Nineteenth Century Philosophy is an outstanding survey and assessment of the century as a whole Divided into seven parts and including thirty chapters written by leading international scholars the Companion examines and assesses the central topics themes and philosophers of the nineteenth century presenting the first comprehensive picture of the period in a single volume German Idealism philosophy as political action including young Hegelians Marx and Tocqueville philosophy and subjectivity including Schopenhauer Kierkegaard and Nietzsche scientific naturalism including Darwinism philosophy of race experimental psychology and Neo Kantianism utilitarianism and British Idealism American Idealism and Pragmatism new directions in Mind and Logic including Brentano Frege and Husserl The Routledge Companion to Nineteenth Century Philosophy is essential reading for students of philosophy and for anyone interested in this period in related disciplines such as politics history literature and religion **An index to periodical literature. 1st suppl., Jan.1, 1882-Jan.1, 1887, by W.F. Poole and W.I. Fletcher** William Frederick Poole,1888 **Kant and the Claims of Knowledge** Paul Guyer,1987-12-25 This book offers a radically new account of the development and structure of the central arguments of Kant's Critique of Pure Reason the defense of the objective validity of such categories as substance causation and independent existence Paul Guyer makes far more extensive use than any other commentator of historical materials from the years leading up to the publication of the Critique and surrounding its revision and he shows that the work which has come down to us is the result of some striking and only partially resolved theoretical tensions Kant had originally intended to demonstrate the validity of the categories by exploiting what he called analogies of appearance between the structure of self knowledge and our knowledge of objects The idea of a separate transcendental deduction independent from the analysis of the necessary conditions of empirical judgements arose only shortly before publication of the Critique in 1781 and distorted much of Kant's original inspiration Part of what led Kant to present this deduction separately was his invention of a new pattern of argument very different from the transcendental arguments attributed by recent interpreters to Kant depending on initial claims to necessary truth Whitehead and Bradley Leemon B. McHenry,1992-01-01 In his magnum opus Process and Reality Alfred North Whitehead claims a special affinity to Oxford philosopher Francis Herbert Bradley McHenry clarifies exactly how much

of Whitehead's metaphysics is influenced by and accords with the main principles of Bradley's absolute idealism. He argues that many of Whitehead's doctrines cannot be understood without an adequate understanding of Bradley in terms of both affinities and contrasts. He evaluates the arguments between them and explores several important connections with William James, Josiah Royce, George Santayana, Bertrand Russell, and Charles Hartshorne.

Oscar Wilde's Oxford Notebooks

Philip E. Smith II, Michael Helfand, 2025-03-31

Oscar Wilde's Oxford Notebooks, which was originally published in 1989, was the first publication of Oscar Wilde's Notebook on History and Philosophy and his Commonplace Book, which he began to keep while a student at Oxford between 1874 and 1879. It will forever alter critical perceptions of Wilde's intentions and achievements. Containing records of his education and reading, quotations and paraphrases of other writers, and Wilde's own analytical and descriptive notes, comments, and fragmentary drafts, the notebooks show the intellectual influences he absorbed while in his early twenties. In a critical commentary, the editors argue that from these sources Wilde developed a synthesis of Spencerian evolutionary theory and Hegelian philosophy that shaped his aesthetic and critical theories, his political ideals, and the themes of his most important fiction. Wilde's synthesis, the editors contend, incorporated the views of scientists and social scientists like T. H. Huxley, Charles Darwin, W. K. Clifford, John Tyndall, E. B. Tylor, and Herbert Spencer; historians like H. T. Buckle, W. H. Lecky, and Ernest Renan; and the English Hegelians Benjamin Jowett and William Wallace. Using this synthesis, Wilde confronted the major controversies of late Victorian intellectual life: the relation of mind and matter in philosophy, the origin and development of culture, and the roles of artist and critic in the improvement of society. In addition to scrupulous annotation, this book provides a description of the manuscripts, historical evidence for dating an introduction that describes the intellectual influence of Wilde's parents and their circle in Dublin, and a commentary that identifies the sources in the notebooks and substantially reinterprets Wilde's criticism and fiction. An insightful and original study that will appeal to Wilde scholars, literary critics, and intellectual historians of the 19th century, the book provides a fresh look into the intellectual development of Wilde and reveals him to be a learned radical humanist whose artistic and intellectual growth occurred within and is representative of the transformation of English cultural criticism after Darwin.

John Dewey

Steven Rockefeller, 1994-03-01

Combining biography and intellectual history, Steven Rockefeller offers an illuminating introduction to the philosophy of John Dewey with special emphasis on the evolution of the religious faith and moral vision at the heart of his thought. This study pays particular attention to Dewey's radical democratic reconstruction of Christianity and his many contributions to the American tradition of spiritual democracy. Rockefeller presents the first full exploration of Dewey's religious thought, including its mystical dimension. Covering Dewey's entire intellectual life, the author provides a clear introduction to Dewey's early neo-Hegelian idealism as well as to his later naturalistic metaphysics, epistemology, theory of education, theory of evaluation, and philosophy of religion. The author tells the story of the evolution of this faith and philosophical vision, offering fresh insight into the enduring value of the thought of America's foremost

philosopher *The Universal Form of the Singular: The Early Philosophy of Ernst Cassirer (1898-1917)* Gustavo Esparza, 2025-10-23 This book examines the philosophical foundations on which Ernst Cassirer bases the central themes of his thought namely function and the symbolic establishing as the core inquiry the way in which knowledge of the singular is made possible Through an exploration of works published between 1898 and 1917 it is argued that knowledge is constituted as a relationship between unity and a general form that enables the designation of a phenomenon as an object of knowledge The justification that the universal is the foundation of the singular can be achieved through Cassirer s philosophy while also providing a fundamental reason for studying his early philosophical period *Strategy in the 21st Century* Lennart Souchon, 2020-06-10 This book presents a detailed discussion of Clausewitz s principal lines of thought and methods of implementation It elaborates on his main objective of laying a foundation for the education of up and coming creative knowledgeable and experienced future leaders The book encourages reflection and study in strategic thinking in order to transform knowledge into genuine capability The book explores the question of what a twenty first century decision maker can learn from these strategic lines of thought It bridges the gap between philosophical theory and strategic interaction in conflicts with an equal opponent Readers learn to understand and employ the clash of wills attack and defence and friction and in essence the necessary virtues of a strategic commander The findings presented help to identify the essential features in complex decision making situations and developing possible courses of strategic action from a holistic standpoint As such the book is a must read for strategists business practitioners and scholars of political leadership and management interested in a better understanding of strategy and decision making [The Subject Index to Periodicals](#) ,1919 *Culture and Identity* Maike Oergel, 2008-08-22 This interdisciplinary study examines the impact of the emerging awareness of historicity on the concepts of modernity identity and culture as they developed in German thought around 1800 It shows how this awareness determined the German notion of the priority of cultural identity Key texts from Sturm und Drang Weimar Classicism German Romanticism and German Idealism including Goethe s Faust I and Wilhelm Meisters Lehrjahre are contextualised in relation to post Enlightenment debates on historicity and modernity The study traces the modification of the Enlightenment concepts of perfectibility and universal ideals to accommodate the new notion of temporal particularity and impermanence This is achieved by embedding these once static concepts in a historical process that is powered by a self prompting internal dialectic Through synthetic absorption within the historical succession the dialectical process allows for the continuity of values while leaving room for discontinuity and difference by relying on oppositional successions The study reveals close connections between the intellectual concerns the literary ambitions and the endeavours to construct a modern German identity during this period which suggests a far greater intellectual coherence of the Goethezeit regarding intellectual challenges and objectives than has been previously assumed [21st Century Anthropology: A Reference Handbook](#) H. Moral Philosophy, from Socrates to the 21st Aeon Andreas Sofroniou, 2010-04-19 Ethics are a set of human rules which morally allow an individual to interact in or live freely within a group of people This may be in society at large a team a professional body or a group of people with similar interests Historically ethics or moral philosophy are as old as human comprehension These can be traced back to the pre historic prohibited and accepted patterns of attitudes Through the ages attempts were made by thinkers to clarify the way people behave share things mix in numbers and maintain standards In modern times the catalogue of such values and rules become part of all professions Ethical contacts change with the advent of a new belief codes of practice and reliance on each other The brief historical survey of Western ethics from Socrates to the 21st century has shown constant themes Each of these major questions is considered by this book in terms of meta ethics normative ethics and applied ethics
