Marvel Graphic Novels and Related Publications Robert G. Weiner, 2008-09-18 This work provides an extensive guide for students, fans, and collectors of Marvel Comics. Focusing on Marvel's mainstream comics, the author provides a detailed description of each comic along with a bibliographic citation listing the publication's title, writers, artists, publisher, ISBN (if available), and a plot synopsis. One appendix provides a comprehensive alphabetical index of Marvel and Marvel-related publications to 2005, while two other appendices provide selected lists of Marvel-related game books and unpublished Marvel titles.

Comic Books and Comic Strips in the United States through 2005 John Lent, 2006-04-30 This final work in John Lent's series of bibliographies on comic art gathers together an astounding array of citations on American comic books and comic strips. Included in this volume are citations regarding anthologies and reprints, criticism and reviews, exhibitions, festivals, and awards, scholarship and theory, and the business, artistic, cultural, legal, technical, and technological aspects of American comics. Author John Lent has used all manner of methods to gather the citations: searching library and online databases, contacting scholars and other professionals, attending conferences and festivals, and scanning hundreds of periodicals. He has gone to great length to categorize the citations in an easy-to-use scholarly fashion, and in the process has helped to establish the field of comic art as an important part of social science and humanities research. The ten volumes in this series, covering all regions of the world, constitute the largest printed bibliography of comic art in the world and serve as the beacon guiding the burgeoning fields of animation, comics, and cartooning. They are the definitive works on comic art research and are exhaustive in their inclusiveness, covering all types of publications: academic, trade, popular, fan, etc., from all over the world. Also included in these books are citations to systematically researched academic exercises as well as more ephemeral sources such as fanzines, press articles, and fugitive materials, conference papers, unpublished documents, etc., attesting to Lent's belief that all pieces of information are vital in a new field of study such as comic art.

The Cancer Plot Reginald Wiebe, Dorothy Woodman, 2024-04-05 In *The Cancer Plot*, Reginald Wiebe and Dorothy Woodman examine the striking presence of cancer in Marvel comics. Engaging comics studies, medical humanities, and graphic medicine, they explore this disease in four case studies: Captain Marvel, Spider-Man, Thor, and Deadpool. Cancer, the authors argue, troubles the binaries of good and evil because it is the ultimate nemesis within a genre replete with magic, mutants, and multiverses. They draw from gender theory, disability studies, and cultural theory to demonstrate how cancer in comics enables an examination of power and responsibility, key terms in Marvel's superhero universe. As the only full-length study on cancer in the Marvel universe, *The Cancer Plot* is an appealing and original work that will be of interest to scholars across the humanities, particularly those

working in the health humanities cultural theory and literature as well as avid comics readers **Being Matt Murdock**

Christine Hanefalk, 2022-07-15 You will never look at Marvel's fan favorite character Daredevil the same way again. In fact, you may even start to look at your own world a bit differently too. Welcome aboard a genre bending ride that combines an ambitious exploration of the science of the senses with a deep dive into the comic book and live action pursuits of the Marvel superhero Daredevil. What could possibly allow someone to hear heartbeats? Is there something it is like to radar sense? Is it true that your remaining senses are enhanced if you lose one of them? And how is it that any of us can sense anything in the first place? Christine Hanefalk takes an in depth look at these questions and many more in this definitive examination of the science of Daredevil's senses. Convinced that Matt Murdock makes for the best thought experiment in comics, the author makes a passionate case for how we might come to understand this fan favorite character on a deeper level, making room for both his blindness and heightened senses. If you are both a Daredevil fan and someone who enjoys the science non-fiction genre, this book is sure to satisfy on both counts. Balancing a healthy amount of irreverence with a meticulously researched examination of the relevant science as well as the history of Matt Murdock's fictional pursuits, *Being Matt Murdock* is sure to entertain and enlighten. About the author: Christine Hanefalk is best known in the Daredevil fandom for her website *The Other Murdock Papers*, where she has been writing about all things Daredevil for well over a decade. Combining her love of Daredevil with a lifelong interest in the natural sciences, she has turned a particular focus to examining the character's heightened senses through a scientific lens. She holds a Master of Science in Engineering degree in Molecular Biotechnology from Uppsala University.
