**Damascius' Problems and Solutions Concerning First Principles** Damaskios,2010-10-28 Damascius was head of the Neoplatonist academy in Athens when the Emperor Justinian shut its doors forever in 529 His work Problems and Solutions Concerning First Principles is the last surviving independent philosophical treatise from the Late Academy Its survey of Neoplatonist metaphysics discussion of transcendence and compendium of late antique theologies make it unique among all extant works of late antique philosophy It has never before been translated into English The Problems and Solutions exhibits a thorough going critique of Proclean metaphysics starting with the principle that all that exists proceeds from a single cause proceeding to critique the Proclean triadic view of procession and reversion and severely undermining the status of intellectual reversion in establishing being as the intelligible object Damascius investigates the internal contradictions lurking within the theory of descent as a whole showing that similarity of cause and effect is vitiated in the case of processions where one order e g intellect gives rise to an entirely different order e g soul Neoplatonism as a speculative metaphysics posits the One as the exotic or extopic explanans for plurality conceived as immediate present to hand and therefore requiring explanation Damascius shifts the perspective of his metaphysics he struggles to create a metaphysical discourse that accommodates insofar as language is sufficient the ultimate principle of reality After all how coherent is a metaphysical system that bases itself on the Ineffable as a first principle Instead of creating an objective ontology Damascius writes ever mindful of the limitations of dialectic and of the pitfalls and snares inherent in the very structure of metaphysical discourse

**Before God** George W. Stroup,2004 Many Christians today have experienced a loss of enormous significance they no longer understand their daily lives to be lived before God This timely work traces the development and implications of this loss and argues for its recovery In comparing contemporary Christians with believers of previous eras author George Stroup sees an eclipse of life lived before God This eclipse is tragic because the Bible presupposes human life as a daily personal relationship with God Stroup here offers help by exploring anew the biblical view that Jesus Christ models most clearly what life lived before God and neighbor looks like He then suggests that describing Christian life as gratitude naturally evokes a sense of life lived before God The book concludes by examining whether life before God requires a sense of God's presence and whether it is possible to live before God even in those times when he seems to be absent Offering thought provoking analysis of modern faith and sound direction for spiritual renewal Before God is perfect for churches study groups pastors and individuals pursuing genuine discipleship

Throughout his academic career Robert Crouse has insisted that the patristic and medieval philosophical and theological traditions which have so profoundly shaped western culture cannot be understood apart from the subtle and complex dialogue between Christianity and Hellenic culture out of which these traditions emerged In this volume in Father Crouse s honour twenty two eminent scholars from across North America and Europe examine various moments within the emergence of the doctrine of creation in the patristic and medieval periods the Hebraic and Hellenic pre history of this movement as well as modern reactions to the partristic and medieval syntheses Student and specialist alike will appreciate not only the depth of scholarly research clearly evident in the individual essays but also the broad scope of the volume as a whole Contributors include Stephen Andrews Stephen F Brown Mary T Clark RSCJ Kevin Corrigan Lawrence Dewan Robert Dodaro OSA Wayne J Hankey Walter A Hannam Michael Harrington Paige E Hochschild Dennis House Edouard Jeaneau Angus Johnston Torrance Kirby Terence J Kleven Marguerite Kussmaul Matthew L Lamb D Gregory MacIsaac Ralph McNerny Luca Obertello Willemien Otten Neil G Robertson Horst Seidl and Michael Treschow

**Cable and Wireless Networks** Mário Marques da Silva,2018-09-03 Cable and Wireless Networks Theory and Practice presents a comprehensive approach to networking cable and wireless communications and networking security It describes the most important state of the art fundamentals and system details in the field as well as many key aspects concerning the development and understanding of current and emergent services In this book the author gathers in a single volume current and emergent cable and wireless network services and technologies Unlike other books which cover each one of these topics independently without establishing their natural relationships this book allows students to quickly learn and improve their mastering of the covered topics with a deeper understanding of their interconnection It also collects in a single source the latest developments in the area typically only within reach of an active researcher Each chapter illustrates the theory of cable and wireless communications with relevant examples hands on exercises and review questions suitable for readers with a BSc degree or an MSc degree in computer science or electrical engineering This approach makes the book well suited for higher education students in courses such as networking telecommunications mobile communications and network security This is an excellent reference book for academic institutional and industrial professionals with technical responsibilities in planning design and development of networks telecommunications and security systems and mobile communications as well as for Cisco CCNA and CCNP exam preparation

**The Year Before the Flood** Ned Sublette,2009-09-01 With a style the Los Angeles Times calls as vivid and fast moving as the music he loves Ned Sublette s powerful new book drives the reader through the potholed sinking streets of the United States s least typical city In this eagerly awaited follow up to *The World That Made New Orleans* Sublette s award winning history of the Crescent City s colonial years he traces an arc of his own experience from the white supremacy of segregated 1950s

Louisiana through the funky year of 2004 2005 the last year New Orleans was whole By turns irreverent joyous darkly comic passionate and polemical *The Year Before the Flood* juxtaposes the city's crowded calendar of parties festivals and parades with the murderousness of its poverty and its legacy of racism Along the way Sublette opens up windows of American history that illuminate the present the trajectory of Mardi Gras from pre Civil War days the falsification of Southern history in movies the city's importance to early rock and roll the complicated story of its housing projects the uniqueness of its hip hop scene and the celebratory magnificence of the participatory parades known as second lines With a grand unforgettable cast of musicians and barkeepers scholars and thugs vibrating with the sheer excitement of New Orleans *The Year Before the Flood* is an affirmation of the power of the city's culture and a heartbreaking tale of loss that definitively establishes Ned Sublette as a great American writer for the 21st century

Sciences Karine Chemla, Renaud Chorlay, David Rabouin, 2016-08-25 Generality is a key value in scientific discourses and practices Throughout history it has received a variety of meanings and of uses This collection of original essays aims to inquire into this diversity Through case studies taken from the history of mathematics physics and the life sciences the book provides evidence of different ways of understanding the general in various contexts It aims at showing how collectives have valued generality and how they have worked with specific types of general entities procedures and arguments The book connects history and philosophy of mathematics and the sciences at the intersection of two of the most fruitful contemporary lines of research historical epistemology in which values e g objectivity accuracy are studied from a historical viewpoint and the philosophy of scientific practice in which conceptual developments are seen as embedded in networks of social instrumental and textual practices Each chapter provides a self contained case study with a clear exposition of the scientific content at stake The collection covers a wide range of scientific domains with an emphasis on mathematics and historical periods It thus allows a comparative perspective which suggests a non linear pattern for a history of generality The introductory chapter spells out the key issues and points to the connections between the chapters     **The Life of Jesus**

For the better part of the last half century the United States has been the World's Police claiming to defend ideologies allies and our national security through brute force But is military action always the most appropriate response Drawing on his vast experience from combat in Vietnam to peacekeeping in Somalia to war games in Washington DC and negotiations with former rebels in the Philippines retired four star General Tony Zinni argues that we have a lot of work to do to make the process of going to war or not more clear eyed and ultimately successful He examines the relationship between the executive and the military including the difference between passive and engaged presidents the failures of the Joint Chief of Staff the challenges of working with the UN coalition forces and NATO the difference between young on the ground officers and less savvy senior leaders the role of special forces and drone warfare and the difficult choices that need to be made to create tomorrow's military Among his provocative points Virtually every recent American military operation follows a disconnected series of actions that lead to outcomes we never foresaw or intended We need to assign accountability for the political decisions that can make or break a mission Words and ideas are as important to victory in today's conflicts as bullets The

cyber war is ongoing Either you must build better tech than the other guy or you must steal it Our foreign aid budget is pitiful our State Department USAID and the other government agencies that we critically need to be on a par with our military are underfunded undermanned and poorly structured for their current objectives From the Oval Office to the battlefield Before the First Shots Are Fired is a hard hitting analysis of the history of America s use of military action and a spirited call for change
